Nutanix Certified Professional (NCP) NCP-DS Exam and Certification Test Engine

NO.31 An administrator is tasked with creating an Objects store with the following settings ?

- * Medium performance (around 10,000 requests per second)
- * 10 TiB capacity
- * Versioning disabled
- * Hosted on an AHV cluster

Immediately after creation, the administrator is asked to change the name of Objects store.

How will the administrator achieve this request?

- * Enable versioning and then rename the Objects store, disable versioning.
- * Delete and recreate a new Objects store with the updated name.

- * The Objects store can only be renamed if hosted on ESXi.
- * Update the name of the Objects store by using a CORS XML file.

NO.32 The administrator is migrating users' home directories from a legacy SAN to Files. The administrator wants to make sure that the users can only access their home directory, and that when a new employee logs in for the first time, a home directory is automatically created.

What should the administrator do to satisfy these requirements?

- * Create a Standard SMB share and edit folder permissions using the MMC plugin.
- * Create a Standard NFS share and set the default access to Read-only.
- * Create a Distributed NFS share and set the default access to No Access
- * Create a Distributed SMB share and edit folder permissions using the MMC plugin.

NO.33 An administrator is using Volumes for its mission critical environments to support its highly transactional Oracle database. Users have reported that recent queries to the database are very slow and the response times have increased as the database has grown The administrator noticed that the database server is built using a single large vDisk for the database and logs How should the administrator resolve this issue?

- * Increase vDisk size for the mission-critical workload and enable flash-mode.
- * Use between four and eight vDisks for the mission-critical workload
- * Increase vDisk size for the mission-critical workload and enable VGLB
- * Increase the iSCSI MaxTransferlength of the clients.

NO.34 An administrator is implementing a storage solution with these requirements:

- * Is easily searchable
- * Natively supports disaster recovery * Access to each item needs to be fast
- * Can scale to petabytes of data
- * Users are granted access after authentication * User data is isolated, but could be shared How should the administrator satisfy these requirements?
- * Configure Calm with an application per user
- * Deploy Objects with AD integration
- * Implement Volumes with CHAP
- * Use Files distributed share with ABE

NO.35 An administrator experiences a failed Objects store deployment, as shown in the exhibit.

Which are the two primary logs that should be reviewed to triage deployment issues?

- * /home/nutanix/data/logs/aoss service manager.out

/home/nutanix/data/logs/msp_controller.out

- * /home/nutanix/data/logs/genesis.out

/home/nutanix/data/logs/msp_controller.out

- * /home/nutanix/data/logs/install.out

/home/nutanix/data/logs/msp_controller.out

- * /home/nutanix/data/logs/insights collector.out

/home/nutanix/data/logs/msp_controller.out

NO.36 An administrator wants to centralize the storage of CCTV data from all its branches in a remote datacenter. To meet compliance standards, the requirements for this solution are as follows:

- * Data must be kept for a minimum of 10 years
- * Data must be accessible for use at any time
- * Data must be secure

How should the administrator satisfy these requirements?

- * Create a Volume Group and mount to a server

2) Configure a Lifecycle policy for a 10year retention

3) Enable encryption on the vDisks

- * 1) Create an Objects bucket

2) Configure WORM for a 10year retention

3) Replace Objects's self-signed certificate with a CA-signed certificate

- * 1) Create a Storage Container

2) Configure WORM for a 10year retention3) Replace Prism Element's self-signed certificate with a CA-signed certificate

- * Create a Files share

2) Configure a Lifecycle policy for a 10 year retention

3) Enable encryption on SMB protocol

NO.37 What are the three main metrics monitored for each Files instance and per share?

- * Concurrent Connections, Throughput and OP sizes
- * Access time, IOPS and Throughput
- * Bandwidth, Speed and IOPS
- * Latency, Throughput and IOPS

NO.38 What fields are included in Object Store alerts?

- * Alert Time, Alert Type, Severity, Title, Message, UUID
- * Title, Source, Impact, severity, resolved, Acknowledged and Create Time
- * Name, Description, Severity, Created and Silenced
- * Severity, Issues, Create Time, Last Occurred, Status, Entities, Documentation

Explanation

https://support-portal.nutanix.com/page/documents/details?targetId=Objectsv3_1:v31-view-osalerts-t.html

NO.39 A storage administrator has been given the task of migrating data from an old storage system to a Files scale-out system. While assessing the assigned task the administrator notes that 2000 home directories with VSS enabled need to be migrated How should the administrator satisfy this need?

- * Create a Distributed share with ABE enabled
- * Configure a Standard share with SSR and ABE enabled
- * Create a Distributed share with SSR and ABE enabled
- * Configure a Standard share with ABE enabled

NO.40 An administrator needs to ensure maximum performance, throughput and redundancy for the company's Oracle RAC implementation, while using the native method for securing workloads.

Which configuration meets these requirements?

- * Files with a general purpose share and File Blocking
- * Volumes with CHAP and multiple Disks
- * Volumes with MPIO and a single vDisk
- * Files with a distributed share and ABE

NO.41 A company's IT security policy requires that all network traffic must be secure, and no web browser certificate error warnings should be accepted by end users.

An administrator is tasked with configuring Objects so that it uses a certificate from an internal Certificate Authority (CA).

How should the administrator configure Objects to meet the security policy?

- * Import the Private key with a Subject Alternate Name of the company domain.
- * Import the Private key and certificate files from the internal CA
- * Regenerate the CSR and download certificates from the internal CA
- * Regenerate the self-signed certificate with RSA 2048 as the bit type.

NO.42 An administrator has received the following alert:

File Server In Heterogeneous State

What is the reason for this alert?

- * The FSVMs do not match in their CPU or memory configuration.
- * The FSVMs are not distributed properly on the hosts in the cluster
- * Performance of the File Server is optimal and the alert can be ignored
- * The hosts where the FSVMs run do not match in their CPU or memory configuration.

NO.43 Which administrator action within Files will enable the monitoring of users files for malware and viruses?

- * Leave the threat detection to the local machine's antivirus application
- * Connect to an Internet Content Adaptation Protocol (ICAP) server
- * Install antivirus on a server and mount the share for scan
- * Install ClamAV on each FSVM

NO.44 A company requires that object data that is unused for a period of 12 months should be moved to AWS Glacier. This should be applied immediately to all new and existing data within the organization. An administrator creates and applies the tiering rule, but observes that no existing data is moved from buckets where the tiering rule is applied, despite being created over 12 months ago.

What is the reason for data over 12 months old failing to tier?

- * Enable versioning has not been selected on the Tiering Endpoint configuration,
- * The category has not been added to existing data.
- * Tiering lifecycle policies are non-retroactive.
- * The Apply to existing data option has not been selected on the life cycle rule.

NO.45 What are the three predefined resource profiles when deploying Objects?

- * Small, Medium, and Heavy
- * Light Medium, and Large
- * Light Medium, and Heavy
- * Small, Medium, and Large

NO.46 An administrator would like to convert an existing Volume Group with an attached external Windows client to use Volumes. The administrator has taken these actions

. Disconnect any existing SCSI targets

Remove targets from the Favorite Targets tab

- * Remove targets from the Discovery tab

Which action must the administrator take next to complete this task?

- * Connect with MPIO to the iSCSI Data Services IP
- * Connect without MPIO to the Cluster Virtual IP
- * Connect without MPIO to the iSCSI Data Services IP
- * Connect with MPIO to the Cluster Virtual IP

NO.47 Recently, many important files were deleted from a specific folder within a Files share. The administrator is asked to provide a list of were deleted.

Within File Analytics, how can the administrator determine which files have been deleted in that specific timeframe!

- * Select <User menu in the top right corner and click on Collect Logs
- * Use Audit Trails search for Users View Audit and filter by operations
- * Use Anomalies Define Anomaly Rules and create a rule to warn when files are deleted
- * Use Audit Trails search for Folders View Audit and enter a date range

Nutanix NCP-DS Exam Syllabus Topics:

TopicDetailsTopic 1- Determine the appropriate method to ensure data availability- recoverability- Configure and utilize Nutanix Data servicesTopic 2- Describe how to monitor performance and usage- Troubleshoot Nutanix Data ServicesTopic 3- Explain Nutanix files high availability process- Configure Nutanix files with advanced featuresTopic 4- Given a scenario, utilize Prism Pro for capacity planning- Utilize file analytics to assess usage patternsTopic 5- Troubleshoot issues related to Nutanix volumes- Analyze and monitor Nutanix data servicesTopic 6- Given a scenario, configure shares, buckets and- or Volume Groups- Identify the steps to deploy Nutanix ObjectsTopic 7- Given a scenario, determine product and sizing parameters- Deploy and upgrade Nutanix data servicesTopic 8- Performance upgrades- maintenance for Files- Objects implementations- Identify the steps to deploy Nutanix FilesTopic 9- Troubleshoot issues related to Nutanix files- Configure Nutanix Objects
