Identity-and-Access-Management-Designer Exam topics

Candidates must know the exam topics before they start of preparation. Because it will really help them in hitting the core. Our **Salesforce Identity-and-Access-Management-Designer exam dumps** will include the following topics:

- Accepting Third-Party Identity in Salesforce 22%- Salesforce as an Identity Provider 23%- Identity Management Concepts 28%- Community (Partner and Customer) 5% **NO.55** Universal Containers is implementing a new Experience Cloud site and the identity architect wants to use dynamic branding features as of the login process.

Which two options should the identity architect recommend to support dynamic branding for the site?

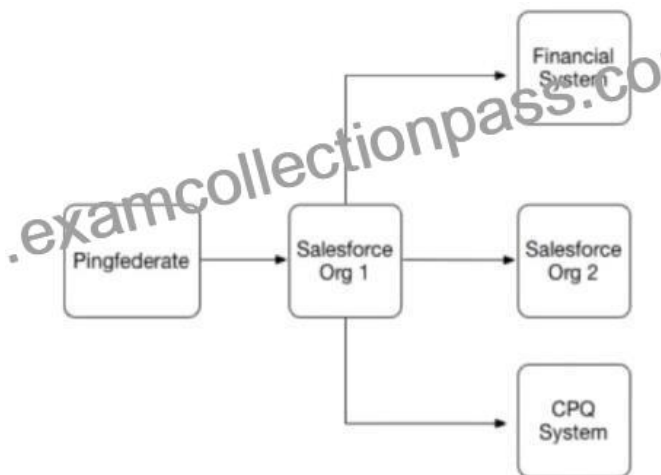

Choose 2 answers

- * To use dynamic branding, the community must be built with the Visualforce + Salesforce Tabs template.
- * To use dynamic branding, the community must be built with the Customer Account Portal template.
- * An experience ID (expid) or placeholder parameter must be used in the URL to represent the brand.
- * An external content management system (CMS) must be used for dynamic branding on Experience Cloud sites.

NO.56 Universal containers (UC) employees have salesforce access from restricted ip ranges only, to protect against unauthorised access. UC wants to rollout the salesforce1 mobile app and make it accessible from any location. Which two options should an architect recommend? Choose 2 answers

- * Relax the ip restriction in the connect app settings for the salesforce1 mobile app
- * Use login flow to bypass ip range restriction for the mobile app.
- * Relax the ip restriction with a second factor in the connect app settings for salesforce1 mobile app
- * Remove existing restrictions on ip ranges for all types of user access.

NO.57 Universal Containers (UC) has implemented SAML-based Single Sign-On to provide seamless access to its Salesforce Orgs, financialsystem, and CPQ system. Below is the SSO implementation landscape.

What role combination is represented by the systems in this scenario?

- * Financial System and CPQ System are the only Service Providers.
- * Salesforce Org1 and Salesforce Org2 are the only Service Providers.
- * Salesforce Org1 and Salesforce Org2 are acting as Identity Providers.
- * Salesforce Org1 and PingFederate are acting as Identity Providers.

NO.58 Universal Containers (UC) would like to enable self-registration for their salesforcepartner community users.

UC wants to capture some custom data elements from the partner user, and based on these data elements, wants to assign the appropriate profile and account values. Which two actions should the architect recommend to UC? Choose 2 answers

- * Modify the communityselfregcontroller to assign the profile and account.
- * Modify the selfregistration trigger to assign profile and account.
- * Configure registration for communities to use a custom visualforce page.
- * Configure registrationfor communities to use a custom apex controller.

NO.59 Universal Containers (UC) wants to use Salesforce for sales orders and a legacy of system for order fulfillment. The legacy system must update the status of orders in 65* Salesforce in real time as they are fulfilled. UC decides to use OAuth for connecting the legacy system to Salesforce. What OAuth flow should be considered that doesn't require storing credentials, client secret or refresh tokens?

- * Web Server flow
- * JWT Bearer Token flow
- * Username-Password flow
- * User Agent flow

NO.60 Universal Containers (UC) has a custom, internal-only, mobile billing application for users who are commonly out of the office. The app is configured as a connected App in Salesforce. Due to the nature of this app, UC would like to take the appropriate measures to properly secure access to the app. Which two are recommendations to make the UC? Choose 2 answers

- * Disallow the use of Single Sign-on for any users of the mobile app.
- * Require High Assurance sessions in order to use the Connected App.
- * Set Login IP Ranges to the internal network for all of the app users Profiles.
- * Use Google Authenticator as an additional part of the login process

NO.61 Universal Containers (UC) would like to enable SSO between their existing Active Directory infrastructure and salesforce. The it team prefers to manage all users in Active Directory and would like to avoid doing any initial setup of users in salesforce

directly, including the correct assignment of profiles, roles and groups.

Which two optimal solutions should UC use to provision users in salesforce? Choose 2 answers

- * Use the salesforce REST API to sync users from active directory to salesforce
- * Use an app exchange product to sync users from Active Directory to salesforce.
- * Use Active Directory Federation Services to sync users from active directory to salesforce.
- * Use Identity connect to sync users from Active Directory to salesforce

NO.62 In an SP-Initiated SAML SSO setup where the user tries to access a resource on the Service Provider, What HTTP param should be used when submitting a SAML Request to the Idp to ensure the user is returned to the intended resource after authentication?

- * RedirectURL
- * RelayState
- * DisplayState
- * StartURL

NO.63 Universal containers (UC) is building a mobile application that will make calls to the salesforce REST API. Additionally UC would like to provide the optimal experience for its mobile users. Which two OAuth scopes should UC configure in the connected App? Choose 2 answers

- * Refresh token
- * API
- * full
- * Web

NO.64 What item should an Architect consider when designing a Delegated Authentication implementation?

- * The Web service should be secured with TLS using Salesforce trusted certificates.
- * The Web service should be able to accept one to four input method parameters.
- * The web service should use the Salesforce Federation ID to identify the user.
- * The Web service should implement a custom password decryption method.

NO.65 Universal Containers (UC) would like to enable self-registration for their Salesforce Partner Community Users.

UC wants to capture some custom data elements from the partner user, and based on these data elements, wants to assign the appropriate Profile and Account values.

Which two actions should the Architect recommend to UC1

Choose 2 answers

- * Configure Registration for Communities to use a custom Visualforce Page.
- * Modify the SelfRegistration trigger to assign Profile and Account.
- * Modify the CommunitiesSelfRegController to assign the Profile and Account.
- * Configure Registration for Communities to use a custom Apex Controller.

NO.66 In an SP-Initiated SAML SSO setup where the user tries to access a resource on the Service Provider, What HTTP param should be used when submitting a SAML Request to the Idp to ensure the user is returned to the intended resource after authentication?

- * RedirectURL
- * RelayState
- * DisplayState
- * StartURL

NO.67 Universal Containers (UC) wants its closed Won opportunities to be synced to a Data Warehouse in near real time. UC has implemented Outbound Message to enable near real-time data sync. UC wants to ensure that communication between Salesforce and Target System is Secure. What Certificate is sent along with the Outbound Message?

- * The CA-Signed Certificate from the Certificate and Key Management menu.
- * The default Client Certificate from the Develop API Menu.
- * The default Client Certificate or a Certificate from Certificate and Key Management menu.
- * The Self-Signed Certificates from the Certificate & Key Management menu.

NO.68 Containers (UC) has implemented SAML-based single Sign-on for their Salesforce application and is planning to provide access to Salesforce on mobile devices using the Salesforce1 mobile app. UC wants to ensure that Single Sign-on is used for accessing the Salesforce1 mobile App. Which two recommendations should the Architect make? Choose 2 Answers

- * Configure the Embedded Web Browser to use My Domain URL.
- * Configure the Salesforce1 App to use the MY Domain URL.
- * Use the existing SAML-SSO flow along with User Agent Flow.
- * Use the existing SAML SSO flow along with Web Server Flow.

NO.69 An Architect has successfully configured SAML-based SSO for Universal Containers. SSO has been working for 3 months when Universal Containers manually adds a batch of new users to Salesforce. The new users receive an error from Salesforce when trying to use SSO. Existing users are still able to successfully use SSO to access Salesforce.

What is the likely cause of this behavior?

- * The new users do NOT have the SSO permission enabled on their profiles.
- * The Federation ID field on the new User records is NOT correctly set.
- * The administrator forgot to reset the new user's Salesforce password.
- * The My Domain capability is NOT enabled on the new user's profile.

NO.70 A multinational industrial products manufacturer is planning to implement Salesforce CRM to manage their business. They have the following requirements:

1. They plan to implement Partner communities to provide access to their partner network .
2. They have operations in multiple countries and are planning to implement multiple Salesforce orgs.
3. Some of their partners do business in multiple countries and will need information from multiple Salesforce communities.
4. They would like to provide a single login for their partners.

How should an Identity Architect solution this requirement with limited custom development?

- * Create a partner login for the country of their operation and use SAML federation to provide access to other orgs.
- * Consolidate Partner related information in a single org and provide access through Salesforce community.
- * Allow partners to choose the Salesforce org they need information from and use login flows to authenticate access.
- * Register partners in one org and access information from other orgs using APIs.
