Latest [Apr 29, 2022] Huawei H12-723_V3.0 Exam Practice Test To Gain Brilliante Result
Take a Leap Forward in Your Career by Earning Huawei H12-723_V3.0

NO.59 The visitor management process includes page customization, account application, user authentication, audit, and logout. After the user successfully applies for an account, he needs to change.

When the account is distributed to users, what stage does the distribution of the account belong to?
* Page customization stage
* Account application stage
* User authentication phase
* Audit and cancellation stage

NO.60 Regarding the use of MAC authentication to access the network in the WLAN networking environment, which of the following statements is wrong en.
* MAC authentication does not require users toinstall any client software.
* The user name format used by MAC authentication is only one of MAC address user name format.

* MAC authentication actually uses 802 1X authentication method.
* MAC bypass authentication solves the situation of both 802.1xclient authentication and MAC authentication in the same network environment.

NO.61 Regarding the description of the ACL used in the linkage between SACG equipment and the TSM system, which of the following statements is correct!?
* default ACL The rule group number can be arbitrarily specified.
* default ACL The rule group number can only be 3999.
* due to SACG Need to use ACL3099-3999 To pick TSM The rules issued by the system, so in the configuration TSM Before linkage, you needto ensure these ACL Not referenced by other functions.
* The original group number is 3099-3999 of ACL Even if it is occupied, it can be successfully activated TSM Linkage.

NO.62 How to check whether the SM and SC silverware start normally after installing the Agile Controller-Campus) (multiple delivery)
* Open https://SM server IP:8943 in the browser, enter the account admin and the default password Changeme123, if the login is successful,it will be explained. The SIM components are normal.
* After logging in to SC, select Resources>Users>User Management to create a common account. Open

https://SM server IP:8447 in the browser newauth, if you can successfully log in using the account created in the previous step, the SM component is normal.
* Open https://SC Server IP:8443 in the browser and enter the account admin and the default password Changeme123. If the login is successful, it will be explained. The SC component is normal.
* Afterlogging in to SM, select Ziyuan>User>User Management, and Xinlu has a common part number.

Open https://SC server IP:8447 newauth in the browser. If you can successfully log in with the account created in the previous step, it means that the SC component isWang Chang.

NO.63 How to check whether the MC service has started 20?
* View in task manager TMCSever Whether the service is started.
* View in task manager TMCServerDaemon Whether the service is started.
* View in task manager TMCServer with TMCSeverDaemon Whether the service is started.
* Select on the server”Start>all programs> Huawei> Agile Cortroler> Sever rtrller”,an examination MCWhether the status is”run”.

NO.64 For hardware SACC Access control, if the terminal does not pass the authentication, it can access the resources of the post-authentication domain. This phenomenon may be caused by the following reasons?

(Multiple choice)
* Authentication data flow has passed SACG filter.
* TSM No hardware is added to the system SACG equipment.
* SACG Enable the default inter-domain packetfiltering.
* Privileges are misconfigured IP

NO.65 Which of the following options are correct for thedescription of visitor management? (Multiple choice)
* Visitor registration account can be configured to be exempt from approval
* Guest login can only be configured as Web Way of webpage
* Anonymous account authentication cannot be performed on the guest authentication page
* Visitor account approval information can be notified to visitors via SMS

NO.66 Regarding the strategy for checking the screensaver settings, which of the following descriptions arecorrect?

(Multiple choice)
* You can check whether the screen saver is enabled on the terminal
* You can check whether the screen saver password is enabled
* Only supports Windows operating system
* Screen saver settings cannot be automatically repaired

NO.67 Which of the following options are right 802. 1X The description of the access process is correct? (Multiple choice).
* Through the entire authentication process, the terminal passes EAP The messageexchanges information with the server.
* Terminal and 802.1X Switch EAP Message interaction,802.1X Switch and server use Radius Message exchange information
* 802.1X Authentication does not require security policy checks.
* use MD5 The algorithm checksthe information.

NO.68 Visitors can access the network through their registered account. Which of the following is not an account approval method?
* Exemption from approval
* Administrator approval
* Receptionist approval
* Self-approved by visitors

NO.69 User access authentication technology does not include which of the following options?
* Authentication
* Isolation repair’
* Security check
* Access control

NO.70 Agile Controller-Campus The department includes four parts of the management center(MC)Business manager(SM)And business controller(SC)And client network access equipment (NAD)As a component of the solution, it is linked with the service controller to realize user access control and free mobility.
* True
* False

NO.71 Typical application scenarios of terminal security include: Desktop management, illegal outreach and computer peripheral management.
* True
* False

NO.72 In some scenarios, ananonymous account can be used for authentication. What are the correct descriptions of the following options for the anonymous account?? (Multiple choice)
* The use of anonymous accounts for authentication is based on the premise of trusting the other party, and the authentication agency does not need the other party to provide identity information to provide services to the other party.
* Agile Controller-Campus Need to be manually created”~anonymous”account number.
* By default, the access control andpolicy of anonymous accounts cannot be performed. 1 Operations such as invoking patch templates and software distribution.
* Administrators cannot delete anonymous accounts”~anonymous*.

NO.73 The use of the 802.1X authentication scheme generally requires the terminal to install specific client software.

For large-scale deployment of client software, the methods that can be taken. What are the cases? (multiple choices)
* Enable Guest VLAN so that users can obtain the installation package in Guest VLAN
* Configure Free-rule and web push functions on the switch to push the installation package to users.

* Copy the installation packages to each other via U disk.
* Installed by the administrator for each user.

NO.74 In the Agile Controller-Campus admission control technology framework, regarding the description of RADIUS, which of the following options is correct?
* PADIUS Used on the client and 802.1X Information such as user names and passwords arepassed between switches.
* PADIUS Used in 802.1X Switch and AAA Information such as user name and password are passed between servers.
* PADIUS Used for Portal Server pushes to users Web page.
* PADIUS Used for server to SACG Security policy issued by the device

NO.75 Free mobility is a special access control method, according to the user’s access location, access time, access method and terminal authorization instructions. Set permissions, as long as the user’s access conditions remain unchanged, the permissions and network experience after accessing the network–To q
* True
* False

NO.76 In WPA2, because of the more secureencryption technology-TKIP/MIC, WPA2 is more secure than WPA.
* True
* False

NO.77 When the -aa command is used on the access control device to test the connectivity with the Radius server, the running result showssuccess, but the user cannot Normal access, the possible reason does not include which of the following options?
* The access layer switch does not start EAP Transparent transmission function.
* wireless 02K In the scenario, the access control device isnot equipped with a security board
* AD The service controller is not added in the authentication scenario AD area.
* The user account or password is incorrectly configured.

NO.78 Windows in environment,Agile Controller-Campus After the installation is successful, how to manually start the management center(MC)? (Multiple choice)
* Double click on the desktop”Start Server”The shortcut starts.
* choose”Start>all programs> Huawei> MCServer> StartServer.
* choose”Start>all programs> Huawei> Agile Controller> Server Startup Config”To manually start the requiredcomponents.
* choose”Start 3 all programs> Huawei> MCServer> Sever Startup Conig”,Manually start the required components

NO.79 The terminal host access control function does not take effect, the following is SACG View information on:

<FW> display right- manager role-id rule

Advanced ACL 3099 ,25 rules,not bingding with vpn-instance Ad’s step is 1 rule 1000 permit ip (1280 times matched) rule 1001 permit ip destination 172.18.11.2210 (581 times matched) rule 1002 permit ip destination 172:18.11.2230 (77 times matched) rule 1003 permit ip destination 172.19.0.0 0.0 255.255 (355 Book times matched) rule 1004 deny ip (507759 times matched) Which of the following statements is correct?
* 172.18.11.221 It is the server of the isolation domain.
* The escape route wasopened.
* 172.18.11.223 It is a post-domain server.
* The terminal host stream is the default ACL Blocked.

NO.80 Which of the following options is not a scenario supported by Free Mobility?
* Intranet users access the data center/Internet.

* When traveling users access intranet resources, traveling users passVPN Access to the intranet.
* Work as a team.
* Realize mutual communication between devices.

NO.81 Regarding the application scenarios of Agile Controller-Campus centralized deployment and distributed deployment, which of the following options are correct? (Multiple select)
* If most end users work in one area and a few end users work in branch offices, centralized deployment is recommended.
* If most end users areconcentrated on–Offices in several regions, and a small number of end users work in branches. Distributed deployment is recommended.
* If end users are scattered in different geographical locations, a distributed deployment solution is recommended.
* Ifend users are scattered in different regions, a centralized deployment solution is recommended.
