### SAP C\_PO\_7517 Exam Description:

The "SAP Certified Technology Associate - Process Orchestration" certification exam validates that the candidate knows the necessary tools, processes and basics for creating orchestration processes using Java technology. This certification proves that the candidate has an overall understanding and in-depth technical skills to participate as a member of a project team in a mentored role. This certification exam is recommended as an entry level qualification.

**NO.108** Which method of the Container object is used to create a Map object?

Choose the correct answers.

- \* void setParameter (String par Name, Object obj);
- \* Global Container get Global Container();
- \* Abstract Trace get Trace();
- \* java.util.Map get Transformation Parameters();

**NO.109** You create an asynchronous scenario. The message sequence must remain identical. Which Quality of Service must you use?

- \* Best Effort (BE)
- \* Exactly Once (EO)

- \* Exactly Once in Order (EOIO)
- \* qRFC

**NO.110** What are the possible sequences of the layers within the application architecture for BPMN process models? Note: There are 2 correct answers to this question.

- \* 1. Backend systems

2. Technical layer(s)

3. Business layer

- \* 1. Business layer

2. Technical layer(s)

3. Backend systems

- \* 1. Technical Layer(s)

2. Business layer

3. Backend systems

- \* 1. Backend systems

2. Business layer

3. Technical layer(s)

**NO.111** Which methods can you use to create interfaces in ESR? Note: There are 2 correct answers to this question.

- \* Imported objects
- \* Data Types
- \* Imported Archives
- \* External definitions

**NO.112** Which of the security authentication methods can be configured in the SOA Manager communication profiles? Note: There are 3 correct answers to this question.

- \* X.509 Client Certificate
- \* SAML Assertion
- \* Security Tokens
- \* SAP Logon Ticket
- \* X.509 Server Certificate

**NO.113** In what scenario is standalone AEX used?

- \* SAPUI5 development
- \* Business Rules
- \* Connectivity
- \* Business Rules

**NO.114** What is a referenced subprocess used for? Choose the correct answer.

- \* To reference another dependent process by the parent process
- \* To reference another independent process by the parent process
- \* To reference another dependent process by the child process

- \* To reference another independent process by the child process

**NO.115** The SAPUI5 runtime is a server-side HTML5 rendering library with a rich set of standard and extension controls.

Determine whether this statement is true or false.

- \* True
- \* False

**NO.116** Which runtime constant is associated with the sender interface name?

Choose the correct answer.

- \* \$SenderService
- \* \$Interface
- \* SInterface Namespace
- \* \$Receiver Name

**NO.117** Which of the following BPMN 2.0 elements belong to the Flow Objects?

Choose the correct answers.

- \* Activities
- \* Data Objects
- \* Events

**NO.118** You have a scenario with an inbound asynchronous Webservice call and you must produce an output file in a specified folder with the name carried inside a field of the payload of the incoming message. You need to create the Dynamic Configuration variable that can be used by the File receiver adapter in order to set the filename. What can you use to implement this?

Note: There are 2 correct answers to this question.

- \* XSLT mapping
- \* Standard adapter module
- \* Standard message mapping functions
- \* Java mapping

**NO.119** Which of the following elements determine the uniqueness of an object in the Enterprise Services Repository (ESR)? Note: There are 3 correct answers to this question.

- \* The service registry
- \* The business system name
- \* The name of the object
- \* The name of the software component
- \* The associated namespace

**NO.120** The operation mapping used in the interface determination must reference an n:m multimapping.

Determine whether this statements is true or false.

- \* True
- \* False

**NO.121** Which statements about process context are true? Choose the correct answers.

- \* It is modeled in the business process.
- \* It includes information from events and activities.

- \* It includes information about roles.
- \* An XSD file adds functionality and is optional.

**NO.122** Which of the following tools are used for creating the configuration view for the integrated configuration?

Choose the correct answers.

- \* Central Advanced Adapter Engine (AAE)
- \* Non-central AAE
- \* Advanced Adapter Engine Extended (AEX)
- \* System Landscape Directory (SLD)

**NO.123** Which are the rules to define the process roles? Note: There are 2 correct answers to this question.

- \* Process roles are assigned to permissions.
- \* Process roles are assigned to process principals.
- \* Permissions are assigned to process roles.
- \* Process principals are assigned to process roles.

**NO.124** During debugging of an integration process, which of the following logs allows you to search for exception IDs?

Please choose the correct answer.

- \* Process log
- \* Business log
- \* J2EE Engine log
- \* Connection log

**NO.125** What do rulesets define in SAP BRM?

- \* A collection of multiple connector rules for a specific business situation
- \* A collection of multiple associated rules for different business situations
- \* A collection of multiple rules for a specific business situation
- \* A collection of multiple graphical representation rules for a specific business situation

**NO.126** Which of the following service interfaces are implemented using Java?

Choose the correct answers.

- \* ValueMappingReplication
- \* ValueMappingReplicationOut
- \* ValueMappingReplicationSynchronous
- \* ValueMappingReplicationOutSynchronous

**NO.127** Which standard conversion functions can you use in the graphical mapping tool? Note: There are 3 correct answers to this question.

- \* OData Lookup
- \* RFC Lookup
- \* Fixvalues
- \* JDBC Lookup
- \* SOAP Lookup

## Introduction to SAP C\_PO\_7517: SAP Certified Technology Associate - SAP Process Orchestration Exam

The ?SAP Certified Technology Associate - Method Orchestration? certification test verifies that the applicant is familiar with the methods, procedures, and fundamentals of orchestration using Java technology. This credential demonstrates that the applicant has a broad understanding and in-depth technical knowledge necessary to contribute as a mentored member of a project team. As an entry level qualification, this certification exam is recommended. SAP recommends preparing for your certification exam by mixing education courses and hands-on experience, as questions will test your ability to apply what you've learned in class. During the certification exam, you are not permitted to use any reference content (no access to online documentation or to any SAP system). The credential test ?SAP Certified Application Associate? verifies that the applicant has the fundamental and core skills needed for the SAP Analytics Cloud Planning. This credential verifies that the applicant has the necessary knowledge and professional expertise to work as part of a project team. As an associate level degree, this credential is suggested.

SAP advises preparing for the qualification exam by mixing instructional classes with hands-on learning, since questions can assess your willingness to apply what you've learned in school. During the qualification exam, you are not permitted to use any reference materials (no access to online documentation or to any SAP system). Using the product code CER006 in the Credential Hub, all SAP contractor certifications may be booked as Cloud Certifications. With CER006 - SAP qualification, you will take up to six exams of your choice in a year from anywhere and whenever it is convenient for you! Individual test days should be chosen and scheduled. There are a variety of teaching methods and qualifications available. They are referred to as ?Topic Areas? and can be identified in each examination summary. The number of questions, the duration of the exam, the places to be checked, and the recommended courses and resources would all be shown. Unregistered materials may be reviewed for upcoming examination releases during certification exams. These unmarked objects are rotated among the subjects at random and are not included in the final score. When non-scored items are used, the cumulative amount of exam items declared in the article will never surpass.
