- * (a)Check out (b)Create, modify, save(c)Stage(d)Commit(e)Stage
- * (a)Create, modify, save(b)Check out(c)Commit(d)Stage
- * (a)Create, modify, save(b)Commit (c)Check out

* (a)Create, modify, save(b)Stage(c)Check out (e)Commit

NO.57 In a SQLScript procedure, which feature can you use to initialize IN/OUT table parameters?

- * SET
- * IS_EMPTY
- * DEFAULT EMPTY
- * DEFAULT

NO.58 A new release of SAP HANA Cloud, SAP HANA database is available as of today.If you do NOT perform the upgrade manually, how much time do you have before your database will be automatically upgraded to the next release?

- * 3 months
- * 7 months
- * 2 weeks
- * 1 year

NO.59 What does the SAP Cloud Application Programming Model provide to enhance cloud-native technologies?Note: There are 3 correct Answers to this question.

- * Data access layers
- * Destination service
- * (Generic) service providers
- * Service SDKs
- * Cloud Foundry service

NO.60 Which resource types can you use in an mta.yaml file?Note: There are 3 correct Answers to this question.

- * com.sap.xs.pgp
- * com.sap.xs.uaa
- * com.sap.xs.hdi-container
- * com.sap.xs.web
- * com.sap.xs.hana-sbss

NO.61 You are using Git in SAP Business Application Studio for version control. You have initialized Git and would like to include the files in your new local repository.What command do you use?

- * git add
- * git commit
- * git push
- * git init

NO.62 You have to create an association between Books and Authors entities using Core Data Services (CDS).Which syntax is applicable?

* entity Books { key ID : Integer; title : String; author : Association to Authors;} Authors { key ID :

Integer;name : String;}

* entity Books {key ID : Integer;title : String; author : Association to Authors;entity Authors {key ID :

Integer; name : String;}}

* entity Books {key ID : Integer; title : String; author : Association to entity Authors { key ID :

Integer;name : String; } ;}

* entity Books { key ID : Integer; title : String; author : Association to Authors;}entity Authors { key ID :

Integer;name : String;}

NO.63 Which of the following types of data model can you develop with SAP HANA Cloud?Note: There are 3 correct Answers to this question.

- * Semantic
- * Spatial
- * Graph
- * Composite
- * Predictive

- * req.headers.connection
- * x-sap-job-id
- * req.headers.authorization
- * x-sap-job-schedule-id

NO.65 Which aspect of model reuse can you use to add both Created by/Created at and Changed by/Changed as information for records?

- * managed
- * temporal
- * localized
- * cuid

NO.66 Which Node.js module do you use to run an SQL statement against the SAP HANA database?

- * @sap/xssec
- * @sap/xsenv
- * @sap/hdbext
- * @sap/hdi

NO.67 What is contained within the Application part of the index.html?

- * Service references
- * Primary UI anchor
- * Initial construction
- * Configurations of files to be loaded

NO.68 You are executing a job using the SAP Job Scheduling service in asynchronous mode.Which HTTP status code does the application return as acknowledgement response?

- * 201- CREATED
- * 200- OK
- * 204- NO CONTENT
- * 202- ACCEPTED

NO.69 Which actions are executed in Cloud Foundry under the Deploy & Execute phase when you run an application? Note: There are 3 correct Answers to this question.

- * Copy the application image to the BLOB store.
- * Release the application and provide the metadata information.
- * Execute service wiring to dependent services.
- * Download required libraries/dependencies.
- * Start a new container with the application image.

NO.70 Which package can you use to read bound services?

- * @sap/xsenv
- * @sap/xssec
- * @sap/hdi
- * @sap/hdbext

NO.71 What is mandatory when working on public Git in a distributed environment?

- * Connect to a central repository to share your project contribution.
- * Keep the entire history of your project locally.
- * Buy the software license on the Git website.
- * Block the piece of code you are working on in the central repository.
