Pass MTCNA - MikroTik Training MTCNA exam [May 29, 2022] Updated 216 Questions
MikroTik MTCNA Actual Questions and 100% Cover Real Exam Questions

How to book the MikroTik Certified Network Associate (MTCNA) Exam

You have to follow these steps to participate in the MikroTik Certified Network Associate (MTCNA) exam:

Step 1: Hover on to the training portal of MikroTik Step 2: Prepare and take the **MTCNA exam test**- Step 3: Select your exam i.e. MTCNA- Step 4: Click the link available- Step 5: Create a new account and log in- Step 6: Follow the instructions to schedule your exam

How to study the MikroTik Certified Network Associate (MTCNA) Exam

Official leaning platforms of MikroTik are available along with **MTCNA exam dumps pdf**.

MikroTik organizes training events and has institutions around the globe. Training sessions for MikroTik are arranged and given at different locations around the world by MikroTik Training Centers. Network engineers, integrators, and managers who want to learn about the routing and management of wired and wireless networks using MikroTik RouterOS will be present.

MikroTik Training Centers (MTC) are independent organizations (companies or individuals) that, according to the official MikroTik Training Description, perform intensive public or private training sessions and qualification tests. MTCs are not connected in any way with each other or with MikroTik. They use their training materials and bear exclusive responsibility for the offered training sessions. Concerning their deals, please contact the MikroTik Training Centers directly.

MikroTik Academies (MA) are educational institutions that provide semester-based Internet networking courses to their academic students, such as universities, technical schools, colleges, vocational schools, and other educational institutions, using MikroTik RouterOS as a learning tool.

MTCNA exam dumps are available online that are, by far, the best-proven study materials. Students can test their understanding of the domain by taking the **MTCNA practice exams** online or by taking the official example test provided in the link that can be accessed from here.

NO.69 In which situations can Netinstall NOT be used to install a RouterBOARD?

- * The router does not have an operating system
- * The router is connected only to a wireless network
- * You do not know the password of the router
- * The router is connected only to a secondary Ethernet port

NO.70 Router A and B are both running as PPPoE servers on different broadcast domains of your network. It is possible to set Router A to use `/ppp secret`; accounts from Router B to authenticate PPPoE customers.

- * true
- * false

NO.71 Which firewall chain should you use to filter clients HTTP traffic going through the router?

- * prerouting
- * forward
- * output
- * input

NO.72 What is the correct action for a NAT rule on a router that should intercept SMTP traffic and send it over to a specified mail server?

- * tarpit
- * dst-nat
- * passthrough
- * redirect

NO.73 `/interface wireless access-list` is used for

- * Handles a list of Client's MAC Address to permit/deny connection to AP
- * Shows a list of Client's MAC Address that are already registered at AP
- * Contains the security profiles settings
- * Authenticate Hot-Spot users

NO.74 If you wish to block user access to MSN messenger, which chain should the firewall rule be placed in?

- * input
- * process
- * forward
- * output

NO.75 On the advanced menu of the wireless setup there is a parameter called `Area`; it works directly with:

- * Connect List
- * Access List
- * None of these
- * Security Profile

NO.76 Which is a default baud-rate of currently manufactured RouterBOARDS?

- * 9600
- * 115200
- * 38400
- * 11520

NO.77 What kind of users are listed in the /user menu?

- * router users
- * wireless users
- * Hot-Spot users
- * pptp users

NO.78 Firewall NAT rules process only the first packet of each connection.

- * True
- * False

NO.79 Domain name system (DNS) requests can use protocol/port:

- * UDP
- * TCP port 53

NO.80 Action=redirect applies to

- * Firewall Filter rules
- * DST-NAT rules
- * Route rules
- * SRC-NAT rules

NO.81 What menus should be used to allow certain websites to be accessed from behind a Hot-Spot interface, without client authentication

- * ip Hot-Spot ip-binding
- * ip Hot-Spot profile
- * ip Hot-Spot walled-garden
- * ip Hot-Spot walled-garden ip

NO.82 When sending out an ARP request, an IP host is expecting what kind of address for an answer?

- * VLAN ID
- * IP address
- * MAC Address
- * 802.11g

NO.83 Mark all correct answers.

- * /ip firewall filter allows to deny authentication to AP
- * Wireless access-list could allow and deny connect to your AP
- * Default-Forwarding could be enabled for a specific clients by wireless access-list
- * The only way to prevent wireless clients connections is; disable wireless interface

NO.84 Which are necessary sections in /queue simple to set bandwidth limitation?

- * target-address, max-limit
- * target-address, dst-address, max-limit
- * target-address, dst-address
- * max-limit

NO.85 If a packet comes to a router and starts a new, previously unseen connection, which connection state would be applied to it?

- * no connection state would be applied to such packet
- * new
- * unknown
- * invalid

* established

NO.86 Router has wireless and ethernet client interfaces, all client interfaces are bridged. To create a DHCP service for all clients, DHCP server must be configured on:

- * Ethernet and wireless interfaces
- * DHCP service is not possible in this setup
- * Every bridge port
- * Only on the bridge interface

NO.87 It is possible to create an encrypted PPPoE tunnel in RouterOS:

- * true
- * false
