# Latest [Jun 09, 2022 Huawei H13-624 Exam Practice Test To Gain Brilliante Result [Q286-Q304

Latest [Jun 09, 2022] Huawei H13-624 Exam Practice Test To Gain Brilliante Result
Take a Leap Forward in Your Career by Earning Huawei H13-624

NO.286 Which of the following concepts are used in object storage service (compatible with Amazon S3 APIs)? (Multiple Choice)
* Bucket
* Object
* Account
* User

NO.287 OceanStor CloudService is a professional remote maintenance system that monitors customer’s device alarms around the clock.
* TRUE
* FALSE

NO.288 Both the production center and disaster recovery center of a bank use Huawei’s hyper-converged storage products, and the two centers perform disaster recovery through asynchronous replication. The copied network type can support GE/10 GE/25 GE.
* True
* False

NO.289 InfoEqualizer feature partition is used to separate nodes of different services. A partition contains a group of nodes. What are the same characteristics of these nodes? (Multiple choice)
* Load balancing strategy
* Hardware type
* Dynamic domain name
* Static domain name

NO.290 In Huawei distributed storage, SCSI volumes with multiple mount points are called shared volumes, and iSCSI volumes are shared volumes. In order to support the backup capability of shared volumes, the block service also supports snapshots of shared volumes, and the snapshot process of shared volumes is the same as that of ordinary volumes.
* True
* False

NO.291 Which of the following statements about data global deduplication is wrong?
* Multiple deduplication copies with different storage strategies use the same DDB.
* Multiple deduplication copies with different storage strategies use the same disk library and deduplication properties.
* Multiple deduplication copies with different storage strategies use the same deduplication pool as the backup target.
* The backup data retention period of multiple different storage strategies needs to be the same

NO.292 Which are possible causes for an enterprise to use virtual tape libraries as the backup media? (Multiple Choice)
* The original tape storage system architecture does not need to be changed.
* The capacity scalability is better than that of physical tape libraries.
* The initial cost of unit storage is lower than that of physical tape libraries.
* The read and write performance is higher than that of physical tape libraries.

NO.293 Which of the following statements are correct?

1. Backup can prevent misoperations and system issues.

2. DR can prevent production data loss in catastrophic data center failures.
* Statement 1 is false. Statement 2 is true.
* Statement 1 is false. Statement 2 is false.
* Statement 1 is true. Statement 2 is true.
* Statement 1 is true. Statement 2 is false.

NO.294 In which scenario, Huawei OceanStor 9000 does not start load balancing?
* Nodes are added.
* Disks are added.
* A disk goes offline three times within 10 minutes.
* A disk is about to fail.

NO.295 Data “write through” will generally be faster than Data “write back”.
* TRUE
* FALSE

NO.296 In the Huawei Oceanstor 9000 system, which of the following functions or parameters are closed to affect the InfoTier function?
* Signature function
* Notify function

* Access time tracking

NO.297 Which one of the following descriptions about WushanSQL is wrong?
* Each node in Wushan SQL shares system resources such as CPU, memory, and storage with each other
* In Wushan SQL, business data is scattered on multiple physical nodes, and data analysis tasks are pushed to the node where the data is located for execution
* Wushan SQL needs to be coordinated through the control module to complete large-scale data processing
* All business data in Wushan SQL are duplicated redundantly and stored in different storage nodes

NO.298 Which of the following can be configured in the backup management system? (Multiple Choice)
* Backup network
* Backup time
* Hosts to be backed up
* Contents to be backed up
* Data backup Destination

NO.299 Huawei Active-Passive DR Solution can not support heterogeneous storage resources.
* TRUE
* FALSE

NO.300 Huawei 3DC DR management network consists of the DR management network and production management network. The two networks must be separately deployed.
* TRUE
* FALSE

NO.301 A file protected by WORM cannot be: (Multiple Choice)
* Read
* Deleded
* Renemed
* Created
* Modified

NO.302 The inforeplicator feature of Oceanstor 9000 (C30) product supports synchronous and asynchronous remote replication at the same time.
* True
* False

NO.303 Regarding the Huawei Distributed Storage Intelligent Load Balancing, which of the following description is incorrect?
* Nodes can be classified as required. For each partition, the load balancing system supports the configuration of independent load policies and independent access domain names.
* When automatic load balancing is performed between all nodes, only performance load balancing is supported, and capacity load balancing is not supported.
* Load balancing strategy can be based on: CPU, memory, bandwidth, number of network connections, node capacity value.
* Load balancing service support: polling method, CPU usage rate, number of node connections.

NO.304 In data backup scenarios, which are characteristics of physical tape libraries? (Multiple Choice)
* Data can be remotely stored in an offline manner for a long term.
* The capacity scalability of a physical tape library is better than that of a disk system,
* The backup and restoration performance is relatively low.
* The management and maintenance costs are low.
