

[Q98-Q114 Best Quality E_HANAAW_17 Exam Questions SAP Test To Gain Brilliante Result!

Best Quality E_HANAAW_17 Exam Questions SAP Test To Gain Brilliante Result!

Preparations of E_HANAAW_17 Exam 2022 SAP Certified Development Specialist Unlimited 176 Questions

Q98. You want to move some of the logic of an ABAP program into an ABAP-managed database procedure (AMDP). To do so, you need to translate Open SQL statements into SAP HANA Native SQL Which of the following are necessary adjustments? Note: There are 3 correct answers to this question.

- * Replace UP TO n ROWS additions
- * Specify the schema for every table
- * Replace ORDER BY additions
- * Replace CORRESPONDING FIELDS additions
- * Add explicit client handling

Q99. Which of the following tools and programming techniques use the SQL data definition language? There are 2 correct answers to this question.

- * ABAP Dictionary
- * Open SQL
- * Core data services (CDS) data definition

- * Core data services (CDS) access control

Q100. What are functions of the ABAP Managed Database Procedure (AMDP) framework? (2 right answers)

- * It deletes obsolete versions of the database procedure synchronously
- * It deletes obsolete versions of the database procedure asynchronously
- * It creates the database procedure when the AMDP is first called.
- * It creates the database procedure when the AMDP is first activated.

Q101. What is the operating system supported by HANA? (2 correct answers)

- * Only Windows 8
- * Red Hat Enterprise Linux (RHEL)
- * SUSE Linux Enterprise Server
- * Both Linux and Window 8

Q102. What are the features of New Open SQL? There are 2 correct answers to this question.

- * Supports arithmetic and string expressions
- * Supports Code adjustment model
- * Supports specific units of database
- * Supports conditional expressions

Q103. What is the full form of HANA?

- * High-Performance Analytic Accelerator
- * High-Performance Analytic Application
- * High Accelerator Numeric Analytics
- * High-Performance Analytic Appliance

Q104. You follow the Code-to-Data paradigm in your ABAP coding.

Which of the following scenarios conflicts with the SQL performance guideline "Keep unnecessary load away from the database"?

- * Perform business logic and aggregations on database table content, then transfer the results to the application layer.
- * Perform join operations on database tables, then transfer the results to the application layer.
- * Perform calculations on data transferred to the database layer, then transfer the results back to the application layer.
- * Perform text search operations on database table content, then transfer the results to the application layer.

Q105. What can you include in the projection list of a Core Data Services (CDS) view? 3 ans

- * ABAP system fields such as sy-langu or sy-mandt / CI String constants and literal values
- * Aggregation functions over fields of ABAP Dictionary tables used in the FROM clause
- * A field from the structural output of an ABAP Managed Database Procedure used in the FROM clause
- * A field from the projection list of another CDS view used in the FROM clause

Q106. Which is not a Golden Rule for Open SQL? Please choose the correct answer.

- * Minimize the Number of Database Accesses
- * Reduce the Database Load
- * Minimize the Amount of Data Transferred
- * Keep the result set large

Q107. SAP HANA: Delivers Across 5 Dimensions. These five dimensions lead to certain goals HANA has to meet. What are these goals?

There are 2 correct answers to this question.

- * Analytical DBMS features
- * Support for system tables
- * High Performance and Scalability
- * Hybrid data and management system

Q108. You have defined the following SQLScript procedure: CREATE PROCEDURE LANGUAGE SQLSCRIPT SQL SECURITY DEFINER READS SQL DATA.

Which type of database procedures can be called in this SQLScript procedure? Please choose the correct answer.

- * Read-write
- * Read only
- * Write only
- * Read-update

Q109. In ABAP Development Tools for SAP NetWeaver, you execute the ABAP Test Cockpit on an ABAP program to find performance optimization potential.

Where can you find the result of the static code checks?

- * In the Problems view
- * In the Project Explorer view
- * In the Performance Analysis view
- * In the Outline view of the ABAP Performance perspective

Q110. What are the different types of Variables in HANA? (3 right answers)

- * Range
- * Double
- * Single Value
- * Interval

Q111. Which system schema contains the information about Time data and Schema Mapping?

- * _SYS_REPO
- * _SYS_BIC
- * _SYS_BI
- * _SYS_XS

Q112. Which of the following is true? (2 correct answers)

- * A read only procedure cannot call read-write procedure.
- * A Read-write procedure cannot call another read-write procedure.
- * A read-write procedure can call both read-write and read only procedures.

Q113. Where can you consume associations in a Core Data Services (CDS) view? 3 ans

- * In the projection list
- * In the name list
- * In the input parameter list
- * In the FROM clause
- * In the WHERE and HAVING clauses

Q114. What must you take into consideration when you use the new open SQL syntax (available as of SAP Net weaver 7.4 SP05)?
There are 2 correct answers to this question.

- * All arithmetic expressions can be used for all type of variables
- * All ABAP variables must be escaped with a preceding @ sign.
- * All Keywords are case sensitive.
- * All fields in the GROUP BY clause must be separated by commas.
