Q88. Where is the configuration information for processing servers stored?

- * Input File Repository Server
- * System database

- * Bootstrap file
- * Win32_x86 directory

Q89. Which server can you use for searching on data, filtering, and aggregation?

- * Explorer Search Server
- * Explorer Indexing Server
- * Explorer Master Server
- * Explorer Exploration Server

Q90. Which of the following functions can you perform using the Promotion Management Tool?

Note: There are 2 correct answers to this question.

Response:

- * Move, import, and convert content from previous versions to BI 4.2.
- * Manage the lifecycle of BI content.
- * Promote security rights.
- * Define the backup strategy.

Q91. Why would you need to change the data source for your query?

Please choose the correct answer.

- * To change the universe connection of your universe
- * To use the production universe instead of the test universe
- * To use different objects from the universe
- * To change the order of execution for existing queries

Q92. Your customer has a 4-node clustered BI environment with two Tomcat servers configured for load balancing in front of the nodes. What additional system functions should be configured to enable high availability in the BI platform? Note: There are 2 correct Answers to this question.

- * Web Application Container Server
- * Processing tier
- * Server Groups
- * Storage tier

Q93. What can you include when you install the SAP BusinessObjects Business Intelligence platform?

Note: There are 2 correct answers to this question.

- * SAP Enterprise Resource Planning
- * Web Application Server
- * SAP Business Warehouse
- * Lifecycle Manager

Q94. Why would you choose the **Web Tier** installation type when installing the Business Intelligence platform?

Note: There are 2 correct answers to this question.

- * To add the Web Service Query application to client workstations
- * To add Web Intelligence Processing servers to an existing cluster
- * To install and configure a new Web Application Server
- * To install required browser plug-ins on client workstations

- * To add web applications to a supported Java server

Q95. In BI 4.3, you want to promote a relational connection between development and quality systems. How can you automatically change the connection details?

- * Use profiles in the Central Management Console (CMC).
- * Use security profiles in the Information Design Tool (IDT).
- * Use connection overrides in Promotion Management (PM).
- * Configure connection pooling on the connection server.

Q96. How does rearranging the objects in the Result pane after the query has run affect the block display?

Please choose the correct answer.

- * The objects are rearranged in the block based on the order in the Results Objects pane.
- * The reordered objects are removed from the block.
- * The block is sorted in ascending order based on the first object in the Results Objects pane.
- * The block remains unchanged.

Q97. What is a benefit of vertically scaling the Web Application Services?

- * Improved system database performance
- * Fault tolerance/failover
- * High system availability
- * Improved Web response speeds

Q98. If you plan a deployment that requires failover and fault tolerance, what options supported by SAP BusinessObjects BI platform are available? Note: There are 2 correct Answers to this question.

- * Exclusive Server Groups
- * Vertical scaling
- * Hardware load balancer
- * Web Application Server clustering solution

Q99. Which types of source document use global profile targets?

Note: There are 2 correct answers to this question.

- * Crystal Reports
- * Web Intelligence
- * Analytic View
- * Dashboards

Q100. Which actions does the Server Intelligence Agent (SIA) perform during start-up?

Note: There are 2 correct answers to this question.

- * Connect to the Auditing Data Store
- * Request a list of servers to manage
- * Start the Web Application Server
- * Start the servers configured to start automatically

Q101. Why would you configure a second Server Intelligence Agent (SIA) on the same host?

- * To allow servers to be secured separately
- * To allow servers to run under different network accounts
- * To take over the management of the first SIA's server if it fails

* To increase the processing capacity of the host

Q102. Which server is used to view and modify Crystal reports with the SAP Crystal Reports Server embedded Software Development Kit (SDK)?

Please choose the correct answer.

- * Crystal Reports 2013 Processing Server
- * Crystal Reports Processing Server
- * Crystal Reports 2013 Report Application Server
- * Crystal Reports Cache Server

Q103. Which server processes platform search service requests?

- * Adaptive Processing Server
- * Event Server
- * Explorer Indexing Server
- * Explorer Master Server
