NEW QUESTION 35

A company has multiple country stores and wants the collection page URL to reflect the language and format specific to the country store. For the site configured with French as the default language, the URL should appear in the following example format: /femmes/chemises/cat1234, where Chemises is the name ofthe collection, its ID is cat1234, and the Chemises collection appears under the Femmes collection.

What are two of the steps they need to do to accomplish this? (Choose two.)
* On the URL Patterns tab of the Setup menu, change the value for the collection page to/

{parentCategory}/categorie/{id}
* For each separate site configured with the French language, update settings to use the new URL patterns
* In the Administration UI, click the Content Language icon and select French as the language.
* Onthe URL Patterns tab of the Setup menu, change the value for the collection page to/

{parentCategory}/{seoUrlSlugDerived}/{id}

NEW QUESTION 36

What are two examples of existing functionality provided with Commerce Cloud custom bindings? (Choose two.)
* display product images
* save local data to disk
* connect to source control repositories
* format date and numbers
* publish messages to other websites

NEW QUESTION 37

The following code from a sample gateway.json file shows the configuration for a web checkout payment gateway extension without the transaction types filled in:

```
{
    "provider": "Web Checkout",
    "paymentMethodTypes": ["generic"],
    "transactionTypes": {
        "generic": ["____", "____", "____"]
    }
}
```

What three of the valid transaction types for thegenericpayment method are needed for web checkout using redirect? (Choose three.)
* authorization
* initiate
* void
* refund
* retrieve

NEW QUESTION 38

Consider the following code from the gateway.jsonfile for a sample payment gateway extension:

```
{
    "provider": "General Payment Gateway",
    "paymentMethodTypes": ["card","cash","physicalGiftCard"],
    "transactionTypes": {
        "card": ["authorization", "void", "refund"],
        "cash": ["initiate", "cancel"],
        "physicalGiftCard": ["balanceInquiry", "authorize", "void", "refund"],
    }
}
```

For which paymentMethodTypes is the processors property (not shown in the code example) required to be defined in your descriptors file?
* card, for both regular and 3D-Secure cards
* card, only for3D-Secure card support

* card, cash, physicalGiftCard
* cash, physicalGiftCard
* physicalGiftCard, only for debit card support

NEW QUESTION 39

What are two types of assets that can be included in a storefront extension? (Choose two.)
* Locale strings
* REST endpoint specifications
* Images
* Java code

NEW QUESTION 40

What are two operational parameters that are configurable by merchants in the Commerce Cloud Administration UI? (Choose two.)
* SSO configuration
* URL patterns for products and collections
* Tax processor
* Siteenablement

NEW QUESTION 41

An account buyer receives an email notification that their order has been approved andthey can pay for the order. Once they click the associated link, it brings them to the B2B Checkout Payment After Approval layout.

Which two are valid statements regarding the B2B Checkout Payment After Approval layout? (Choose two.)
* This is an out-of-the-box layout that provides payment options for orders requiring approval
* The layout is of type Checkout and is displayed to account shoppers only
* The layout allows the buyer to modify the order details and input payment information
* The layout isonly displayed when the order status is PENDING_PAYMENT
Explanation

Orders that meet the criteria for requiring approval are sent back to OCC and put into the out-of-the-box order approvals workflow.
Set the layout to be displayed when the Order Status isPENDING_PAYMENT

NEW QUESTION 42

A company is setting up multiple country-specific sites that have unique emails, separatepayment gateways and shipping methods by country, and other site-specific settings. They share Oracle integrations (e.g. Oracle Retail Order Management System Cloud, Oracle Loyalty Cloud, Oracle Customer Experience Cloud). They plan to add sites in the Administration UI.

Based on their use case, when should they create the additional sites to minimize the changes they need to make?
* At any time, because updates to shared configuration to the default site alter the child sites.
* Create the additional sites before configuring anything on the default site.
* Configure the Oracle integrations for the default site and then create additional sites.
* Configure the default site fully and then add the additional sites.

NEW QUESTION 43

The Commerce Cloud storefront extension framework provides a set of resources, templates and libraries that support the

implementation of custom client-side store extensions.

What are two aspects of this framework? (Choose two.)
* JavaScript code which provides client-side page logic
* Commerce Cloud delivered libraries with resources that support client-side development
* Integrated development environment for Commerce Cloud
* Code management repository tools

NEW QUESTION 44

If your storefronthas both B2B and B2C implementations, you will need to have one Order History Layout for B2B as well as a different Order History Layout for B2C.

What is the reason for this?
* Each layout will use different instances of the Secondary Navigation widget, depending if the shopper is account based or not.
* If implemented, delegated administrators can view a list of all previous orders placed from the account shopper.
* Account-based orders are tied to an Account, and the Order History Layout for B2B needsa B2B Order History widget instance.
* You cannot have one layout used for both B2B and B2C shoppers.

NEW QUESTION 45

The Payment Processing menu on the Settingspage of the Administration UI has a Payment Options property with two choices: Full Payment Required and Allow Partial Payment.

When should the Allow Partial Payment option be selected?
* One of the supported payment methods used on the order requires shopper action during payment processing
* All payment methods used on the order can be processed at the same time
* The storefront uses standard payment widgets
* If one payment of a partial payment fails, the successful payments are voided immediately and the order stays incomplete

NEW QUESTION 46

Which three features are supported in a B2B Storefront implementation? (Choose three.)
* A displaying products and prices that are specific to the logged in contact’s account
* managing account buyers andaddresses on the storefront by contacts with account specified storefront roles
* simultaneously logging into multiple accounts in order to compare product items and prices
* requiring an order approval based on a specified price threshold associated with the account
* sharing a purchase list with a contact from another account

NEW QUESTION 47

A storefront developer is configuring pagelayouts of type Shopper Profile for a B2B storefront implementation.

Which two items must be considered when configuring the Profile Navigation – Account Shoppers widget instance on each layout? (Choose two.)
* On the My Account page, account contacts will always see all options defined in the Profile Navigation

– Account Shoppers widget instance
* If displayed using a vertical orientation, the Profile Navigation – Account Shoppers widget instance should be configured to take up the same number of columnson each layout

* Each entry in the Profile Navigation – Account Shoppers widget instance settings can only have one corresponding layout specified by the URL
* Each Shopper Profile layout should contain a shared Profile Navigation – Account Shopperswidget instance

NEW QUESTION 48

Which two are required to communicate with an Order Management System (OMS) Integration Service when integrating with an OMS from Commerce Cloud? (Choose two.)
* Shopper Profile Update event webhook
* OrderSubmit event webhook
* Admin Orders REST API
* Custom order management widget

NEW QUESTION 49

Given this widget JavaScript snippet using the CCRestClient library:

```
ccRestClient.request("getProduct",
  null,
  successFunction(widget),
  errorFunction(widget),
  "xprod2119"
);
```

What is the URL of the created request to Commerce Cloud?
* GET /ccstore/v1/products
* GET /ccstore/v1/products/xprod2119
* POST /ccstore/v1/products
* PUT /ccstore/v1/products/xprod2119
* GET/ccstore/v1/products?getProduct=xprod2119

NEW QUESTION 50

When working with the agent REST APIs, the site context is important. What are two ways the sitecontext can be set? (Choose two.)
* siteIdproperty in the JSON request and response
* the webhook’ssiteIdproperty setting
* site request header, such as{“X-CCSite” : “siteA”}
* query parameter, such as POST/ccagent/v1/orders?siteId=siteA

Oracle 1Z0-1068-21 Exam Syllabus Topics:

TopicDetailsTopic 1- Configure B2B features in the Administration UI- Manage site context with Agent endpointsTopic 2-
Implement storefront account administration- Describe the storefront architectureTopic 3- Explain typical custom integration
projects in a store implementation- Edit storefront components in the Administration UITopic 4- Use storefront libraries in
widget JavaScript- Store Implementation Requirements and DesignTopic 5- Explain the features that support account-based
commerce- Use data bindings in storefront template codeTopic 6- Describe the payment framework for OOTB and custom
payment integrations- Explain the capabilities of the extension framework
