

## (Aug-2022) JN0-334 Exam Dumps Contains FREE Real Questions from the Actual Exam [Q50-Q65]

(Aug-2022) JN0-334 Exam Dumps Contains FREE Real Questions from the Actual Exam  
Free Test Engine Verified By JNCIS-SEC Certified Experts

### Conclusion

There's never a perfect time to make a career-changing decision. But this is certainly the best time to get ahead in your career using a reputable certification that will validate your competency in managing Juniper Networking solutions and products. It is a big decision that starts with choosing the right designation, preparing for the required exam, and passing it. And that exam today is the Juniper JN0-334, which covers all the aspects you need to build a fruitful career. This post has attempted to cover everything you need to know to clear JN0-334 exam. So, the remaining percentage is solely a personal decision. Make it happen today!

### NEW QUESTION 50

Which two functions are performed by Juniper Identity Management Service (JIMS)? (Choose two.)

- \* JIMS synchronizes Active Directory authentication information between a primary and secondary JIMS server.
- \* JIMS forwards Active Directory authentication information to SRX Series client devices.
- \* JIMS collects and maintains a database of authentication information from Active Directory domains.
- \* JIMS replicates Active Directory authentication information to non-trusted Active Directory domain controllers.

### NEW QUESTION 51

Which default protocol and port are used for JIMS to SRX client communication?

- \* WMI over TCP; port 389
- \* ADSI over TCP; port 389
- \* HTTPS over TCP; port 443
- \* RPC over TCP, port 135

### NEW QUESTION 52

What are two fields that an SRX Series device examines to determine if a packet is associated with an existing flow? (Choose two.)

- \* protocol
- \* source IP address
- \* source MAC address
- \* type of service

### NEW QUESTION 53

Which two statements describe how rules are used with Juniper Secure Analytics? (Choose two )

- \* When a rule is triggered. JSA can respond by sending an e-mail to JSA administrators.
- \* Rules are defined on Junos Space Security Director, and then pushed to JSA log collectors
- \* A rule defines matching criteria and actions that should be taken when an event matches the rule
- \* When a rule is triggered. JSA can respond by blocking all traffic from a specific source address

### NEW QUESTION 54

You are changing the default vCPU allocation on a vSRX.

How are the additional vCPUs allocated in this scenario?

- \* The vCPU are allocated equally across the Junos control plane and packet forwarding engine.
- \* One dedicated vCPU is allocated for the Junos control plane and the remaining vCPUs for the packet forwarding engine.
- \* One dedicated vCPU is allocated for the packet forwarding engine, one for the Junos control plane, and the remaining vCPUs are equally balanced.
- \* One dedicated vCPU is allocated for the packet forwarding engine and the remaining vCPUs for the Junos plane.

### NEW QUESTION 55

You have deployed JSA and you need to view events and network activity that match rule criteria. You must view this data using a single interface.

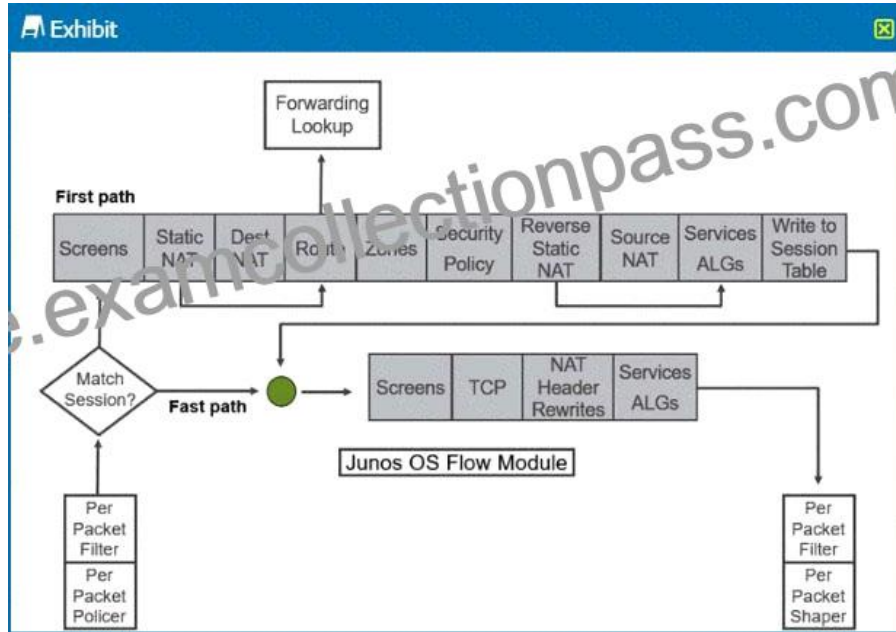

Which JSA feature should you use in this scenario?

- \* Log Collector

- \* Assets
- \* Network Activity
- \* Offense Manager

### NEW QUESTION 56

Click the Exhibit button.

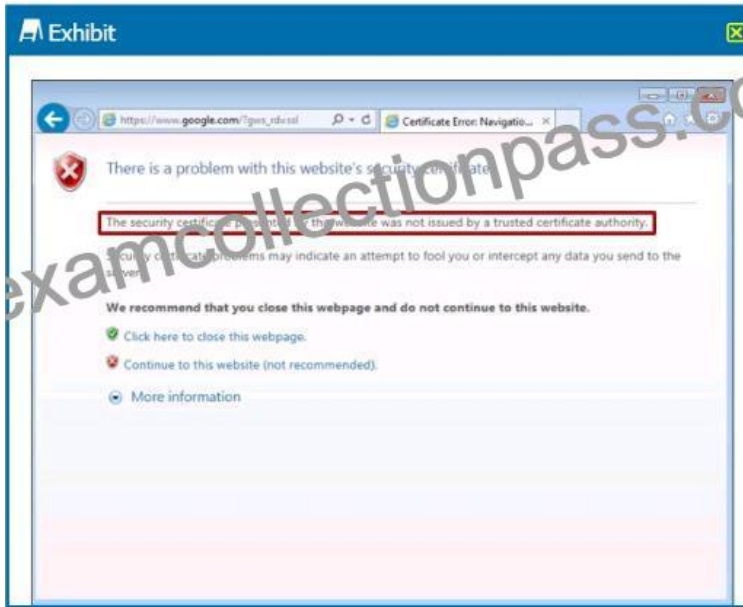

Referring to the SRX Series flow module diagram shown in the exhibit, where is IDP/IPS processed?

- \* Forwarding Lookup
- \* Services ALGs
- \* Screens
- \* Security Policy

### NEW QUESTION 57

Exhibit.

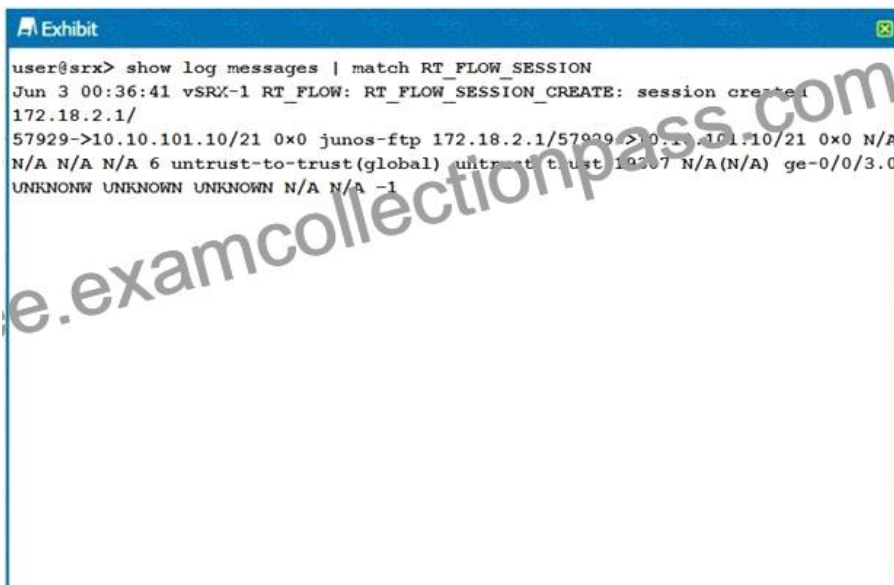

You have implemented SSL proxy client protection. After implementing this feature, your users are complaining about the warning message shown in the exhibit. Which action must you perform to eliminate the warning message?

- \* Configure the SRX Series device as a trusted site in the client Web browsers
- \* Regenerate the SRX self-signed CA certificate and include the correct organization name
- \* Import the SRX self-signed CA certificate into the client Web browsers
- \* Import the SRX self-signed CA certificate into the SRX certificate public store

#### NEW QUESTION 58

Click the Exhibit button.

The output shown in the exhibit is displayed in which format?

- \* syslog
- \* sd-syslog
- \* binary
- \* WELF

#### NEW QUESTION 59

What are the maximum number of supported interfaces on a vSRX hosted in a VMware environment?

- \* 4
- \* 10
- \* 3
- \* 12

#### NEW QUESTION 60

The AppQoE module of AppSecure provides which function?

- \* The AppQoE module provides application-based routing
- \* The AppQoE module prioritizes important applications.
- \* The AppQoE module provides routing, based on network conditions
- \* The AppQoE module blocks access to risky applications

#### NEW QUESTION 61

What are two examples of RTOs? (Choose two.)

- \* IPsec SA entries
- \* session table entries
- \* fabric link probes
- \* control link heartbeats

#### NEW QUESTION 62

In an Active/Active chassis cluster deployment, which chassis cluster component is responsible for RG0 traffic?

- \* the backup routing engine of the primary node
- \* the master routing engine of the secondary node
- \* the primary node
- \* the secondary node

#### NEW QUESTION 63

Which statement is true about JATP incidents?

- \* Incidents have an associated threat number assigned to them.
- \* Incidents are sorted by category, followed by severity.
- \* Incidents consist of all the events associated with a single threat.
- \* Incidents are always automatically mitigated.

Explanation

#### NEW QUESTION 64

You want to support reth LAG interfaces on a chassis cluster.

What must be enabled on the interconnecting switch to accomplish this task?

- \* RSTP
- \* 802.3ad
- \* LLDP
- \* swfab

#### **NEW QUESTION 65**

What are two supported hypervisors for hosting a vSRX? (Choose two.)

- \* VMware ESXi
- \* Solaris Zones
- \* KVM
- \* Docker
