UiPath-Ardv1 Exam topics
Candidates must know the exam topics before they start of preparation. Our **UiPath-Ardv1 exam dumps** will include the following topics:

1. UiPath Studio

     - Describe how to use state machines versus flowcharts and sequences- Describe how to write coherent log messages and how to use them to debug a process- Identify and describe background versus foreground automation

2. UiPath Studio - Activities and Properties

     - Describe and demonstrate the use of the various UI synchronization activities; for example, ElementExists, FindElement, and Find Text- Identify, describe, and apply the key UI Activities properties; for example, ContinueOnError,

DelayBefore, DelayAfter, and Target- Identify, describe, and demonstrate how activities are used to automate actions in Excel, email, and .pdfs- Extract structured data from an application to UiPath Studio- Identify and describe the differences between using Simulate versus Send Windows

Message versus Default

3. UiPath Studio - Robotic Enterprise (RE) Framework

- Describe the differences between Dispatcher and Performer- Modify the REFramework to work with or without UiPath Orchestrator- Differentiate between using the Settings fields and Assets fields in the configuration file- Identify and describe the differences between a transaction process and a repetitive process- Describe how queues and tabular data are used within the REFramework- Apply the proper Log fields for analytical reporting- Describe how the Dispatcher is used to upload transaction items and how the Performer is

used to consume the queues and process the transactions

4. Selectors

- Describe how Tags and Attributes are used for a UI element, and how UI Explorer is used for

selectors- Identify and describe how string manipulation, regular expressions, and string methods are

used- Explain how to use the Invoke Code and Invoke Method activities- Describe how to initialize variables such as datatables- Describe how to filter datatables

5. Advanced Functions

- Describe how to work with Orchestrator queues and assets- Identify and describe how to use version control; for example, working with GIT, SVN, or TFS

for version control- Explain how to modularize multiple workflows by creating and using library components, and creating smaller process components- Identify and describe UiPath coding best practices; for example, reviewing code using best

practices

6. Error Handling and Troubleshooting

- Identify and describe the use of the error handling activities such as Try Catch, Throw,

Rethrow, and Retry Scope- Examine and describe the activities and/or features used to troubleshoot, debug, and modify processes- Determine and describe the different logging levels such as Trace, Information, Error, and Fatal logs and how they are applied

Difficulty in writing UiPath-Ardv1 Exam

Many candidates appear to take the UiPath Certified Advanced RPA Developer (UiARD) Exam but could not manage to pass in their first attempt. There could be many reasons behind the failure of the candidates who try to take the UiPath-Ardv1 exam, such as the lack of study material, lack of practice or lack of time management during the exam, etc. But the most important factor that causes the failure of the candidates is that they don't use the proper learning material. To pass the UiPath-Ardv1 exam, you should use a reliable preparation source that contains complete information about the UiPath-Ardv1 exam.

UiPath Certified Advanced RPA Developer (UiARD) is the most powerful certification that candidates can have on their resume. But for this, they will have to pass UiPath-Ardv1 exam. UiPath-Ardv1 is an advanced level exam conducted by UiPath, to pass this exam candidates will have to work hard with the help of the right focus and preparation material, passing this exam is an achievable goal. ExamcollectionPass help candidates by providing the most relevant and updated UiPath-Ardv1 exam dumps. Furthermore, We also provide the UiPath-Ardv1 practice test that will be much beneficial in the preparation. ExamcollectionPass aims to provide the best UiPath-Ardv1 exam dumps that are verified by the UiPath certified Industry experts. If candidates feel any doubt in the UiPath-Ardv1 practice test then our team is always there to help them. **UiPath-Ardv1 exam dumps** are the perfect way to prepare UiPath-Ardv1 exam and which will be helping candidates to pass the exam with good grades in their first attempt itself. So, candidates want instant success in the UiPath-Ardv1 exam with quality UiPath-Ardv1 training material then ExamcollectionPass is the best option for them.

NO.61 What layout should be used for UI navigation and data processing?

Options are :

* State Machine
* Sequence
* Flowchart

NO.62 This is a reliable selector for a dynamic web page: webctrl idx=’144′ tag=’IMG’/ Options are :
* True
* False

NO.63 Review the following exhibits:

Based on the exhibits, what is the output of the sequence?
* <blank line> A2X9k
* A1bx3

A1bx3
* A1bx3

A2X9k
* A2X9k

A2X9k

NO.64 How can you identify a column in a DataTable?

Options are :
* By using the column index.
* By using the row index.
* By using the column default value.
* By using the column name.

**NO.65** How should a UiPath developer handle frequent changes in the project files?

Options are :
* Old versions of the project files are not relevant
* By creating daily backups of the files
* By using a source control solution, such as SVN, TFS, etc.

NO.66 A developer is using GIT for version control. While the developer is attempting to Commit and Push a local file to the repository, the following pop-up message is displayed:

What is the reason for the pop-up message?
* Project was not properly checked out in Studio and merge failed into the master.
* Local repository is not synchronized with the remote one.
* Opened project was disconnected from the source control.
* Local version was not connected to any branch.

NO.67 How can you delay the Automatic Recording?

Options are :

* By hitting the Escape key
* By right clicking
* Not possible
* By hitting the F2 key

NO.68 Which Queue Item properties can be used to control the order in which the items are processed?

Options are :
* ItemInformation
* Priority
* Deadline
* Postpone

NO.69 What status does a job have when a schedule is triggered in Orchestrator, but there are no available robots to execute it?

Options are :
* In progress
* Pending
* New

NO.70 In the UiPath Robotic Enterprise Framework template, what happens if the processing of a transaction item falls with an Application Exception of a System Error?

Options are :
* All use application are closed and then re-initialized
* The execution of the transaction item is retried if the MaxRetryNumber config value is greater than 0
* The process executes the End Process state

NO.71 A developer wants to design a process in which multiple decision points will be used to accommodate complex scenarios.

In UiPath Studio, which recommended type of workflow meets this requirement?
* State Machine
* Sequence
* Global Exception Handler
* Flowchart

NO.72 What happens if the ClickBeforeTyping property in a Type Into activity is selected?

Options are :
* Before typing, a click is performed at the current mouse position.
* Before typing, a click is performed on the top left corner of the UiElement.
* Before typing, a click is performed at the center of the UiElement.

NO.73 What is the Attach Window activity used for?

Options are :
* To specify the browser container you will be working with
* Specifies that you are working with a java window
* To specify the top-level window container you will be working with

NO.74 In UiPath Robotic Enterprise Framework, the value of MaxRetryNumber in the Config.xlsx file should be set to a number greater than 0 to enable the retry mechanism in the following cases:

Options are :
* Get data from UiPath Orchestrator queues with Auto Retry disabled.
* Get data from spreadsheets, databases, email, web API.
* Do not work with UiPath Orchestrator queues.

NO.75 How can you pass data between workflows?

Options are :
* By using arguments.
* By using variables.
* By using a pipe.

NO.76 You want to identify a selector for a button in an application. The selector will be used as the target in a Click activity.

In order to ensure the Click activity executes as intended, how many elements should the selector be valid for at runtime?
* 1 element
* 2 elements
* 3 elements
* 5 elements

NO.77 What direction can the arguments of a workflow have?

Options are :
* In arguments
* Out arguments
* In/Out arguments

NO.78 When fine-tuning a dynamic selector, how many characters does “*” replace?
* Zero or more
* Exactly one
* One or more
* More than one

NO.79 A developer plans to create a process to automate a web application. The web application requires HTML buttons and text boxes to be loaded. Although some assets may still be loading, the robot should perform the UI actions once the buttons and text boxes are loaded.

Which property should be configured?
* TimeoutMS = 10000
* WaitForReady = Complete
* TimeoutMS = Int32.MaxValue
* WaitForReady = Interactive
