Pass JN0-250 Exam with Updated JN0-250 Exam Dumps PDF 2022
JN0-250 Exam Dumps - Free Demo & 365 Day Updates

Why chose the Juniper JN0-250 exam dumps of the ExamcollectionPass for the preparation?

Nor any other exam dumps, in the world, have the same quality of the Certification questions or the answers. Our exam dumps are carefully prepared by the best experts in the industry. We keep our exam dumps regularly updated and improved. You can download the Juniper **JN0-250 exam dumps** anytime, anywhere. Just visit our website or our mobile app and get your exam dumps.

Moreover, you can also read our reviews and customer feedback. It will help you to figure out that whether our braindumps are useful for you. 100% Guarantee Our Guarantee We know that our work is not easy, and we always try to put our best efforts to ensure that you get the best Juniper JN0-250 exam preparation material as well as test questions. Failed candidates can get a full refund, of the payment of exam dumps. We are aware of the fact that how much difficult it is to pass the Juniper JN0-250 exam on the first attempt and this is why we provide you with a 100% Money-Back Guarantee.

NEW QUESTION 19

You are configuring your Mist network and you want to separate certain users into their own networks and VLANs. You are concerned about the network's utilization and want to make sure that only a single SSID is sending beacons.

In this scenario, which feature would accomplish this behavior?

- * geofence
- * multiple PSK
- * virtual SSID

- * SSID scheduling

NEW QUESTION 20

Which organization is responsible for WLAN standards?

- * FCC
- * IEEE
- * IETF
- * ISO

NEW QUESTION 21

You configured an 802.11n AP to use the 2.4 GHz frequency band and 20 MHz channel width.

In this scenario, how many non-overlapping channels are available for clients to use in Europe?

- * 11
- * 4
- * 1
- * 6

NEW QUESTION 22

A Mist access point is booting up, and will soon receive a channel assignment from the Mist Cloud. The channel assigned by the cloud is a DFS channel.

In this scenario, what must the AP do before broadcasting an SSID on the channel?

- * Validate client device support.
- * Listen for radar.
- * Transmit radar pulses for 60 seconds.
- * Validate available non-DFS channels.

NEW QUESTION 23

Which 802.11 amendment added OFDMA?

- * 802.11b
- * 802.11n
- * 802.11ax
- * 802.11ac

NEW QUESTION 24

What are two characteristics of the 2.4 GHz band when compared to the 5 GHz band? (Choose two.)

- * shorter wavelength
- * lower frequency
- * less non-Wi-Fi interference
- * more congestion

NEW QUESTION 25

Users are complaining about WLAN performance and the Mist dashboard reports non-Wi-Fi interference.

Which diagnostics tool would you use to further investigate this issue on-site and determine the location of the interference?

- * spectrum analyzer
- * protocol analyzer
- * wireless design software
- * WLAN scanner

NEW QUESTION 26

You are troubleshooting a WLAN from a mobile handheld device that displays radio information. You see a signal on the same SSID from two separate access points (APs). AP A shows a signal strength of -57 dBm and AP B shows a signal strength of -72 dBm.

In this scenario, which statement is correct?

- * dBm is not a measure of signal strength.
- * The client's signal strength is not known.
- * Access point A has the stronger signal.
- * Access point B has the stronger signal.

NEW QUESTION 27

Which organization is responsible for creating the 802.11 standard?

- * Wi-Fi Alliance
- * Ethernet Technology Consortium
- * Institute of Electrical and Electronics Engineers (IEEE)
- * International Organization for Standardization (ISO)

NEW QUESTION 28

You have discovered an access point that is connected to a corporate network, but it is not under the corporation's control.

In this scenario, what is this type of access point called?

- * honeypot
- * air gap
- * rogue
- * neighbor

NEW QUESTION 29

What is the width for a 2.4 GHz OFDM channel?

- * 20 MHz
- * 30 MHz
- * 5 MHz
- * 10 MHz

NEW QUESTION 30

Which underlying technology does Mist use to calculate BLE location?

- * trilateration
- * triangulation

- * probability surface
- * time of flight

NEW QUESTION 31

What are two requirements to connect an AP to the Mist Cloud? (Choose two.)

- * You need a CA SSL certificate.
- * You need DNS resolution.
- * You need a static IP address.
- * You need a DHCP server

NEW QUESTION 32

When would be the earliest opportunity to configure an access point (AP)?

- * after you are on the same network as the AP
- * after the AP is installed
- * after the AP is online
- * after the AP is claimed to inventory

NEW QUESTION 33

A microwave oven would be classified as which type of interference?

- * Wi-Fi
- * rogue
- * security
- * non Wi-Fi

NEW QUESTION 34

Which two statements about the Mist UI are true? (Choose two.)

- * It can initiate a wireless packet capture.
- * It can initiate a wired packet capture.
- * It can initiate a BLE packet capture.
- * It can initiate a packet capture on cloud uplink.

NEW QUESTION 35

Which device is responsible for roaming decisions?

- * user
- * client
- * controller
- * AP

NEW QUESTION 36

You have discovered an access point that is not connected to the corporate network but it broadcasts the corporation's SSID.

In this scenario, what is this type of access point called?

- * honeypot
- * neighbor

- * rogue
- * air gap
