[2023] DEX-450 Exam Dumps, Test Engine Practice Test Questions
Pass DEX-450 exam [Jan 04, 2023] Updated 295 Questions

How much Salesforce DEX-450 Exam Cost

The price of the Salesforce DEX-450 certification is \$375 USD, for more information related to the Salesforce DEX-450 Exam please visit Salesforce website.

What is the duration, language, and format of Salesforce DEX-450 Exam - Certification Validity period : 3 years.-

Passing score 80%- This exam is offered in only English.- There is a time limit of 120 minutes for the exam.

The validity of the Salesforce DEX-450 certification is three years.

Salesforce DEX-450 Exam Syllabus Topics:

Topic 1- Describe the syntax of a trigger definition- Display data from a record in a Visualforce page
Topic 2- Write a basic query using Salesforce's query language, SOQL- Write Apex to invoke DML operations and handle DML errors
Topic 3 - Write a query that traverses a child-to-parent and parent-to-child relationship- Creating Roll-Up Summary Fields
Topic 4- Write tests for action methods, getters, setters, and properties- List the differences between the ways you can invoke DML operations
Topic 5- Describe the memory lifecycle for static attributes- Use Platform Events for Immediate Error Logging
Topic 6- Describe common limit issues and security concerns- Launch a Visualforce page using a custom button
Topic 7- Describe

practices for writing code that is easy to maintain and extend- Write triggers and classes that assume batches of data as input
 Topic 8- Describe how triggers fit into and can be impacted by the Order of Execution- Building a Data Model on the Salesforce Platform
 Topic 9- Visualforce Development Considerations and Testing- Determine what data an Apex class can access
 Topic 10 - Referencing Custom Controllers and Controller Extensions- Use the sObject data type, the primitive data types, and basic control statements in Apex
 Topic 11- Describe strategies for Testing Visualforce controllers- Use SOQL to Query Parent-Child Relationships

NEW QUESTION 50

A Visualforce page is required for displaying and editing Case records that includes both standard and custom functionality defined in an Apex class called myControllerExtension.

The Visualforce page should include which <apex:page> attribute(s) to correctly implement controller functionality?

- * controller=”Case” and extensions=”myControllerExtension”
- * extensions=”myControllerExtension”
- * controller=”myControllerExtension”
- * standardController=”Case” and extensions=”myControllerExtension”

NEW QUESTION 51

code below deserializes input into a list of Accounts.

```

01 public class AcctCreator {
02     public void insertAccounts() {
03         String acctsJson = getAccountJson();
04         List<Account> accts = (List<Account>) JSON.deserialize(acctsJson,
List<Account>.class);
05
06         // DML to insert accounts
07     }
08     // ... other code including getAccountJson implementation
09 }
    
```

Which code modification should be made to insert the Accounts so that field-level security is respected?

- * 01: Public with sharing class AcctCreator
- * 05: If (ObjectType.Account, isCreatable())
- * 05: Accts = database.stripInaccessible (accts, Database. CREATEABLE);
- * 05: SubjectAccessDecision sd= Security.stripInaccessible(AccessType,CREATEABLE,

NEW QUESTION 52

A team of many developers work in their own individual orgs that have the same configuration at the production org. Which type of org is best suited for this scenario?

- * Developer Sandbox
- * Developer Edition
- * Full Sandbox
- * Partner Developer Edition

NEW QUESTION 53

Universal container wants a list button to display a visualforce page that allows users to edit multiple records which visualforce feature supports this requirement.

- * Recordsetvar page attribute

NEW QUESTION 54

Which three process automations can immediately send an email notification to the owner of an Opportunity when its Amount is changed to be greater than \$10,000? Choose 3 answers

- * Workflow Rule
- * Flow Builder
- * Approval Process
- * Escalation Rule
- * Process Builder

NEW QUESTION 55

A large corporation stores Orders and Line Items In Salesforce for different lines of business. Users are able to see Orders across the entire organization, but, for security purposes, should only be able to see the Line Items in their line of business.

Which type of relationship should be used between Line Items and Orders?

- * Master-Detail
- * Lookup
- * Direct Lookup
- * Indirect Lookup

NEW QUESTION 56

A developer must provide a custom user interface when users edit a Contact. Users must be able to use the interface in Salesforce Classic and Lightning Experience.

What should the developer do to provide the custom user interface?

- * Override the Contact's Edit button with a Visualforce page in Salesforce Classic and a Lightning component in Lightning Experience.
- * Override the Contact's Edit button with a Visualforce page in Salesforce Classic and a Lightning page in Lightning Experience.
- * Override the Contact's Edit button with a Lightning component in Salesforce Classic and a Lightning component in Lightning Experience.
- * Override the Contact's Edit button with a Lightning page in Salesforce Classic and a Visualforce page in Lightning Experience.

NEW QUESTION 57

A developer must implement a CheckPaymentProcessor class that provides check processing payment capabilities that adhere to

what defined for payments in the PaymentProcessor interface. public interface PaymentProcessor { void pay(Decimal amount); }

Which is the correct implementation to use the PaymentProcessor interface class?

* Public class CheckPaymentProcessor implements PaymentProcessor {

```
public void pay(Decimal amount) {}
```

```
}
```

* Public class CheckPaymentProcessor implements PaymentProcessor {

```
public void pay(Decimal amount);
```

```
}
```

* Public class CheckPaymentProcessor extends PaymentProcessor {

```
public void pay(Decimal amount);
```

```
}
```

* Public class CheckPaymentProcessor extends PaymentProcessor {

```
public void pay(Decimal amount) {}
```

```
}
```

NEW QUESTION 58

Where are two locations a developer can look to find information about the status of asynchronous or future calls? Choose 2 answers

- * Apex Flex Queue (Missed)
- * Apex Jobs (Missed)
- * Paused Flow Interviews component
- * Time-Based Workflow Monitor

NEW QUESTION 59

Which trigger event allows a developer to update fields in the Trigger.new list without using an additional DML statement? Choose 2 answers

- * Before insert
- * Before update
- * After update
- * After insert

NEW QUESTION 60

Which three tools can deploy metadata to production? (Choose three.)

- * Change Set from Developer Org
- * Force.com IDE
- * Data Loader
- * Change Set from Sandbox
- * Metadata API

NEW QUESTION 61

From which 2 locations can a developer determine the overall code coverage for a sandbox?

- * The test suite run panel of the developer console
- * The apex classes setup page
- * The apex test execution page
- * The tests tab of the developer console

NEW QUESTION 62

What are three techniques that a developer can use to invoke an anonymous block of code? (Choose three.)

- * Use the SOAP API to make a call to execute anonymous code.
- * Create a Visualforce page that uses a controller class that is declared without sharing.
- * Run code using the Anonymous Apex feature of the Developer's IDE.
- * Type code into the Developer Console and execute it directly.
- * Create and execute a test method that does not specify a runAs() call.

NEW QUESTION 63

What is the result of the following code block ?

```
Integer x = 1; Integer Y = 0; While(x < 10){Y++;}
```

- * An error occurs
- * Y = 9
- * Y = 10
- * X = 0

NEW QUESTION 64

Universal Container(UC) wants to lower its shipping cost while making the shipping process more efficient. The Distribution Officer advises UC to implement global addresses to allow multiple Accounts to share a default pickup address. The Developer is tasked to create the supporting object and relationship for this business requirement and uses the Setup Menu to create a custom object called 'Global Address'. Which field should the developer add to create the most efficient model that supports the business need?

- * Add a Master-Detail field on the Account object to the Global Address object
- * Add a Master-Detail field on the Global Address object to the Account object.
- * Add a Lookup field on the Account object to the Global Address object.
- * Add a Lookup field on the Global Address object to the Account object

NEW QUESTION 65

A developer wants to invoke an outbound message when a record meets a specific criteria.

Which three features satisfy this use case?

Choose 3 answer

- * Approval Process has the capacity to check the record criteria and send an outbound message without Apex Code
- * Process builder can be used to check the record criteria and send an outbound message with Apex Code.
- * workflows can be used to check the record criteria and send an outbound message.
- * Process builder can be used to check the record criteria and send an outbound message without Apex Code.
- * Visual Workflow can be used to check the record criteria and send an outbound message without Apex Code.

NEW QUESTION 66

What are three techniques that a developer can use to invoke an anonymous block of code? Choose 3 answers

- * Create a visualforce page that uses a controller class that is declared without sharing
- * Type code into the developer console and execute it directly
- * Type code into the execute anonymous tab in the force.com IDE and click execute
- * Use the SOAP API to make a call to execute anonymous code
- * Create and execute a test method that does not specify a runas() call

NEW QUESTION 67

What is the advantage of Salesforce Lightning?

- * Uses service side for better handling
- * Option 4
- * Pre-defined components to give Standard Look and Feel
- * Option 3

NEW QUESTION 68

A developer considers the following snippet of code:

```
Boolean isOK;  
integer x;  
String theString = 'Hello';  
  
if (isOK == false && theString == 'Hello'){  
    x = 1;  
} else if (isOK == true && theString == 'Hello'){  
    x = 2;  
} else if (isOK != null && theString == 'Hello'){  
    x = 3;  
} else {  
    x = 4;  
}
```

Based on this code, what is the value of x?

- * 2
- * 1
- * 3
- * 4

NEW QUESTION 69

Which tool allows a developer to send requests to the Salesforce REST APIs and view the responses?

- * REST resource path URL
- * Workbench REST Explorer
- * Developer Console REST tab
- * Force.com IDE REST Explorer tab

NEW QUESTION 70

While writing a test class that covers an OpportunityLineItem trigger, a Developer is unable to create a standard PriceBook since one already exists in the org.

How should the Developer overcome this problem?

- * Use Test.getStandardPricebookId() to get the standard PriceBook ID.
- * Use @IsTest(SeeAllData=true) and delete the existing standard PriceBook.
- * Use Test.loadData() and a Static Resource to load a standard Pricebook.
- * Use @TestVisible to allow the test method to see the standard PriceBook.

NEW QUESTION 71

What are two ways that a controller and extension can be specified on a Visualforce page?

Choose 2 answers

- * a @pex:page=Account extends=”myControllerExtension”
- * Qo apex:page standardController=”Account” extensions=”myControllerExtension”
- * apex:page controllers=”Account, myControllerExtension”
- * apex:page controller=”Account” extensions=”myControllerExtension””

NEW QUESTION 72

A developer writes a trigger on the Account object on the before update event that increments a count field. A workflow rule also increments the count field every time that an Account is created or updated. The field update in the workflow rule is configured to not re-evaluate workflow rules.

What is the value of the count field if an Account is inserted with an initial value of zero, assuming no other automation logic is implemented on the Account?

- * 1
- * 3
- * 4
- * 2

NEW QUESTION 73

A company wants to create an employee rating program that allows employees to rate each other. An employees average rating must be displayed on the employee record. Employees must be able to create rating records, but are not allowed to create employee records. Which two actions should a developer take to accomplish this task?

- * Create a trigger on the Rating object than updates a field on the Employee object.
- * Create a roll-up summary field on the Employee and use AVG to calculate the average rating score.
- * Create a lookup relationship between the Rating and Employee object.
- * Create a master-detail relationship between the Rating and Employee objects.
