Exam:80 questionsDuration:180 minsSample Questions: SAP C_S4CDK_2022 Exam Sample Question

SAP C_S4CDK_2022 Certification Exam Topics:

Topic AreasTopic Details, Courses, BooksSAP S/4HANA Cloud and Extensibility Overview < 8%Explain the basic concepts of extensibility as it pertains to SAP S/4HANA On-Premise and Cloud, define Cloud-Native Apps, and set up your environment. -

S4C80 In-App Extensibility > 12%Create and expose In-App Extensions - S4C80 Side-by-Side Extensibility > 12% Create Side-by-Side extensions, combine In-App and Side-by-Side Extensions, consume advanced services, and react to SAP S/4HANA and SAP S/4HANA Cloud events - S4C80 RISE with SAP S/4HANA Cloud > 12%Explain the basic concepts of SAP Activate methodology as it pertains to RISE with SAP S/4HANA Cloud implementations. - S4C01e Advanced Extensibility

Scenarios 8% - 12% Describe advanced Extensibility scenarios. - S4C80 **DevOps and Continuous Delivery < 8%** Describe DevOps and Continuous Delivery, perform rapid setup of Continuous Delivery, explain the Continuous Delivery Pipeline, adapt the Continuous Delivery Pipeline to your needs, and operate cloud applications. - S4C80 **Security > 12%** Describe security from an extensibility perspective and build secured extension applications. S4H13 (openSAP) **Application Testing < 8%** Use SAP certified test tools, create and then execute test plans. - S4C80

SAP C_S4CDK_2022 Exam Description:

The "SAP Certified Development Associate - SAP Cloud SDK Extensibility Developer" certification exam validates that the candidate possesses the fundamental and core knowledge required of the SAP Cloud SDK developer profile. This certification proves that the candidate has an overall understanding and in-depth technical skills to participate as a member of a project team in a mentored role. This certification exam is recommended as an entry level qualification.

The certificate issued for passing this exam will be valid for 5 years.

QUESTION 32

Which of the Integration techniques used by side-by-side applications allows you to only read data?

- * Public APIs like oDATA, REST and SOAP APIs
- * Customer enabled oDATA service for released CDS views
- * BAPIs via SAP Cloud SDK or RFC using SAP Cloud Connector
- * Customer enabled oDATA service for Custom Business Objects

QUESTION 33

Your JSON Web Token (JWT) is issued by the XSUAA service in the Cloud Foundry environment. What does this JWT contain?

- * The session ID of the user
- * The scope(s) to which the user is assigned
- * The list of applications the user can access
- * The SAML metadata of the user's identity provider

QUESTION 34

In which SAP Activate phase is the project initiated and planned?

- * Realize
- * Prepare
- * Discover
- * Explore

QUESTION 35

What do you confirm when the OAuth2 authorization server requests that you authorize an OAuth2 client?

- * That the OAuth2 client can act on behalf of the user only under a specific scope
- * That the OAuth2 client can act only on behalf of the cloud application
- * That the OAuth2 client can act only on its own behalf
- * That the OAuth2 client can always act on behalf of the user under the full set of scopes

QUESTION 36

You are creating a Custom Business Object (CBO) in SAP S/4HANA Cloud. Which activities can you perform? Note: There are 3 correct Answers to this question.

- * Choose the option to generate a UI.
- * Choose to generate an OData service.
- * Create multiple sub-nodes for one business object.
- * Create a custom service interface.
- * Access CBO in SAP S/4HANA Cloud BAdI implementations.

QUESTION 37

Which of the following are core principles of DevOps? Note: There are 3 correct Answers to this question.

- * Continuous learning and experimentation
- * Feedback
- * S
- * Design-led thinking
- * Scaling

QUESTION 38

You have set up the scopes and attributes that are needed to protect your application in the Cloud Foundry environment, but a user CANNOT access your application. What might be the reason?

- * Roles collections are NOT assigned to the role template.
- * Roles are NOT assigned to the application.
- * Roles are NOT assigned to the user.
- * Role collections are NOT assigned to the user.

QUESTION 39

How do you achieve a zero-downtime deployment using the SAP Cloud SDK Pipeline?

- * Use the Maven archetype to generate the project.
- * Provide configuration details in the pipeline_config.yml file.
- * Use the Docker image optimized for zero-downtime deployment.
- * Include the Hystrix library to ensure resilience.

QUESTION 40

What is the correct sequence of steps when implementing Tenant-aware Persistence?

- * Configure a data source Configure Hibernate for multi-tenancy Tenant onboarding and offboarding Persisting and accessing the data
- * Configure Hibernate for multi-tenancy Configure a data source Tenant onboarding and offboarding Persisting and accessing the data
- * Configure a data source Configure Hibernate for multi-tenancy Persisting and accessing the data Tenant onboarding and offboarding
- * Tenant onboarding and offboarding Configure a data source

Configure Hibernate for multi-tenancy Persisting and accessing the data

QUESTION 41

Which of the following are essential pillars for building cloud-native applications? Note: There are 3 correct Answers to this question.

- * Containers
- * In-memory
- * Microservices
- * Continuous Delivery
- * Splitting Container

QUESTION 42

What are the benefits of using Side-by-Side Extensibility? Note: There are 3 correct Answers to this question.

- * It provides support for hybrid scenarios.
- * It uses a full-fledged development platform to enable the creation of extension applications.
- * It integrates with other cloud/non-cloud solutions when using SAP Cloud Platform Integration services.
- * It uses In-App tools to adapt the standard UI.
- * It can be implemented in the same software stack as the extended application.

QUESTION 43

Which authentication and connection activity does the SAP Cloud SDK handle automatically?

- * It creates a communication arrangement with the user ID and password in the SAP S/4HANA Cloud system.
- * It determines the configuration by consuming the destination service on SAP Cloud Platform.
- * It exchanges the SAML assertion with the identity provider.
- * It manages user accounts and provides Single Sign-On.

QUESTION 44

In which In-App extensions can you directly manage the usage of Custom Fields for the Apps enabled for key user extensions?

Note: There are 3 correct Answers to this question.

- * Custom Tile
- * Enabled Business scenarios
- * Custom Analytics
- * Custom Forms
- * Custom Communication Scenarios

QUESTION 45

You use the Nest Framework and Visual Studio Code to develop an extension application. Which activities can you perform in the development environment? Note: There are 2 correct Answers to this question.

- * Automatic re-build of a TypeScript program when the source code is modified.
- * Run the Java program and make it stop at breakpoints.
- * Automatic re-deploy of a JavaScript program when the source code is modified.
- * Run the JavaScript program and make it stop at breakpoints.

QUESTION 46

What is Elastic Stack?

- * An orchestration service that uses elastic load balancers.
- * A group of open source products designed to collect logs from multiple services.
- * A cloud computing architecture that allows dynamic resource scaling.

- * An open source automation server, helping to automate the parts of software development.

QUESTION 47

Which activities can you perform with the Custom CDS View app? Note: There are 2 correct Answers to this question.

- * Import CDS view from an XML file
- * Join multiple associated data sources
- * Modify the data type of a field in existing CDS views
- * Define input parameters

QUESTION 48

Which activity is part of information technology operations (Ops)?

- * Create CI; automate build process in dev system
- * Design CI; create new theme for better user experience
- * Configure CI; administrate the deployed release
- * Verify CI; deploy continuously into test system

QUESTION 49

How can you set up authentications for an application developed on the Cloud Foundry environment on SAP Cloud Platform? Note: There are 3 correct Answers to this question.

- * Set up the application router.
- * Configure a data source.
- * Protect the backend microservice.
- * Bind the microservice to XSUAA.
- * Set up the cloud connector.

QUESTION 50

What is the restricted ABAP Language optimized for? Note: There are 3 correct Answers to this question.

- * Reusability
- * Robustness
- * Scalability
- * Security
- * Data consistency
