

## 2023 New C\_IBP\_2302 Dumps - Real SAP Exam Questions [Q49-Q73]

### 2023 New C\_IBP\_2302 Dumps - Real SAP Exam Questions Dependable C\_IBP\_2302 Exam Dumps to Become SAP Certified

The demand for supply chain management professionals with a strong understanding of the latest technologies has been increasing in recent years. With the exponential growth of e-commerce and the globalization of business, companies need experts who can manage complex supply chains efficiently. This has created an increasing demand for individuals who are experts in SAP IBP for Supply Chain. This platform enables organizations to integrate and manage their supply chain processes, from planning to execution. In order to prove their expertise, supply chain professionals are encouraged to take the SAP C-IBP-2302 exam.

#### QUESTION 49

Which pre-processing steps can be used to cleanse historical sales data before generating a statistical forecast in SAP IBP? Note: There are 2 correct answers to this question.

- \* Substitute Missing with Mean or Median in Sales History
- \* Intermittency Detection and Correction in Sales History

- \* Promotion Sales Lift Elimination
- \* Bias Detection and Correction in Sales History

#### QUESTION 50

You are reviewing the master data types that are often used for supply and inventory planning

.Which master data types are compound master data types?Note: There are 2 correct answers to this question.

- \* SOURCELOCATION
- \* SOURCECUSTGROUP
- \* SOURCECUSTOMER
- \* SOURCEPRODUCTION

#### QUESTION 51

What function would you use to configure a year-to-date calculation?

- \* Rolling Aggregation
- \* Last Period Aggregation
- \* Cumulative Aggregation
- \* Dynamic Rolling Aggregation

#### QUESTION 52

You set up time-series integration using Cloud Integration for Data Services. During the integration process of master data, an error occurred. In the Data Integration app the job failed with status '&#8220;Fatal Error&#8221;. How can you find more details about the error?

- \* Navigate to the Master Data Workbook in Excel and open the Log.
- \* Download the Rejection Report in the Data Integration app.
- \* Navigate to the Manage Master Data app and open the Log.
- \* Download the Initial Problem Report in the Data Integration app.

#### QUESTION 53

Which features apply to quota violations modeled with the optimizer?

- \* Quotas can be modeled for sourcing location, production, and consensus demand.
- \* Because quota violations shouldn&#8217;t be possible, the non-delivery cost rate is less than quota violation cost.
- \* Min and Max Quotas have to be the same as sourcing ratios.
- \* The optimizer will only violate quotas if quotas are maintained as time-dependent key figures.

#### QUESTION 54

You need to use your resource cost effectively with a certain minimum use, even if it means producing more than demand.Which solutions would apply to this scenario?Note: There are 2 correct answers to this question.

- \* Capacity leveling will be possible for production and storage resources.
- \* Balance can be achieved between excessive prebuild and minimum use by incorporating violation costs.
- \* Excess stock can be generated and will need to be staged in an overflow warehouse.
- \* Minimum capacity utilization will result in pull production occurring.

#### QUESTION 55

Where can the results of a Time Series Analysis be used?Note: There are 2 correct answers to this question.

- \* During XYZ segmentation in the Manage ABC/XYZ Segmentation Rules app
- \* In Global (multi-stage) Inventory Optimization to calculate time-phased Recommended Safety Stock Outputs
- \* In the Manage Forecast Error Calculations app &#8211; Demand Planning app to calculate the Forecast Error CV
- \* In the Microsoft Excel add-in, where you can use them to limit and filter your planning views

#### QUESTION 56

Time profiles are made out of levels, and levels are made out of periods.Which ways can SAP IBP identify profiles and periods?Note: There are 2 correct answers to this question.

- \* Periods are identified by an alphanumeric prefix and profiles by an integer.
- \* Both periods and profiles are identified by a unique integer.
- \* Both periods and profiles have start and end dates.
- \* Periods are identified by an integer and profiles by an alphanumeric prefix.

#### QUESTION 57

Which of the following are features of the S&OP process templates?Note: There are 2 correct answers to this question.

- \* New instances of templates allow for re-use of the same processes.
- \* All process templates are assigned to dashboards.
- \* Each step depicted in the template can have tasks associated with it.
- \* The S&OP process step can be started with an application job.

#### QUESTION 58

A time profile is defined with these levels: day, technical week, week, month, quarter, and year. What condition in configuration will allow you to have a different value in the current week, versus all other time buckets?

- \* IF(&#8220;PERIODID4&#8221; =&#8221;,\$\$PERIODID4CU\$\$&#8230;)
- \* IF(&#8220;PERIODID2&#8221; =&#8221;,\$\$PERIODID2CU\$\$&#8230;)
- \* IF(&#8220;PERIODID3&#8221; =&#8221;,\$\$PERIODID3CU\$\$&#8230;)
- \* IF(&#8220;PERIODID5&#8221; =&#8221;,\$\$PERIODID5CU\$\$&#8230;)

#### QUESTION 59

You are configuring disaggregation for the KF1 key figure in the Planning Areas Model Configuration app.Which methods can you use?Note: There are 3 correct answers to this question.

- \* Disaggregation according to a helper key figure
- \* Proportional disaggregation by using KF2 in the expression
- \* Disaggregation according to an equal split
- \* Disaggregation according to a user-defined expression
- \* Disaggregation in batch triggered by an application job

#### QUESTION 60

What are some of the prerequisites for configuring a planning area that results in a successful consistency check?Note: There are 2 correct answers to this question.

- \* Configure at least one calculated key figure for the planning area.
- \* Specify a planning horizon in the planning area for each level of the assigned time profile.
- \* Configure at most two input key figures on the same planning level in a key figure calculation.
- \* Assign the compound master data type and its component master data types.

### QUESTION 61

For your project, you create a new planning area and consider how to create analytics and alerts for it. How can you create these objects?

- \* Use the option for copying analytics and alerts into the new planning area from the existing custom planning area.
- \* Create analytics and alerts in the new planning area from scratch using the Intelligent Visibility application.
- \* Use the option for copying analytics and alerts when creating a new planning area from the sample SAPIBP1.
- \* Merge analytics and alerts into a new planning area from any sample planning area.

### QUESTION 62

Which of the following are functions of SAP IBP for demand? Note: There are 2 correct answers to this question.

- \* Demand sensing of demand data using predictive analytics tools
- \* Embedded, on-the-fly demand analytics
- \* Detailed statistical analysis of demand data using predictive analytics tools
- \* Consideration of demand-driven analysis for buffer positioning.

### QUESTION 63

Safety Stock outputs from Multistage Inventory Optimization are sent to which of these processes? Note: There are 2 correct answers to this question.

- \* Decoupling Points determination in SAP IBP for demand-driven replenishment
- \* Supply Heuristics in SAP IBP for sales and operations
- \* Charts creation in SAP Supply Chain Control Tower
- \* Demand Sensing with Gradient Boosting (Full)

### QUESTION 64

Which of the following checks for master data and key figures does the Check Mode algorithm trigger? Note: There are 3 correct answers to this question.

- \* It checks whether the location products specified in the master data are connected by customer sourcing rules within the supply chain network.
- \* It checks whether the location resource specified in the master data forms a cycle in the supply chain network.
- \* It checks whether the sourcing in the Production Source Item Master Data type exists.
- \* It checks whether the heuristic detects cycles formed by nodes (such as location products) in the supply chain network.
- \* It checks whether the required planning level master data exists for a subset of input key figures.

### QUESTION 65

Which of the following data inputs, when increased, will always cause an increase in the safety stock outputs when the Global (multi-stage) Inventory Optimization operator is run? Note: There are 2 correct answers to this question.

- \* Holding Cost Percentage
- \* Minimum Lot Size
- \* Target Service Level
- \* Transportation Lead Time Error CV

### QUESTION 66

What is a prerequisite for modeling outsourced manufacturers with production capacity using the Supply Optimizer?

- \* Use production lead times and offsets to manage components at the outsourced manufacturing location
- \* Ensure that the outsourced manufacturing locations have a separate subnetwork
- \* Model target inventory and stocks at the outsourced manufacturing location
- \* Model relative production costs across internal locations and outsourced manufacturing locations

#### QUESTION 67

Which applications are present in the sample model SAPIBP1?Note: There are 3 correct answers to this question.

- \* Demand Driven Replenishment
- \* Response Planning
- \* Sales and Operations Planning
- \* Inventory Optimization
- \* Demand Sensing

#### QUESTION 68

Which are the mandatory preconditions for an attribute that can be used for saving the segmentation results?Note: There are 2 correct answers to this question.

- \* The Business Meaning of the attribute has been specified.
- \* The attribute should be a non-key attribute of the master data type.
- \* The attribute belongs to a simple or compound master data type.
- \* The attribute should be assigned to all planning levels.

#### QUESTION 69

You are working with inventory key figures.What are some of the business scenarios where you can use the Last Period Aggregation function?Note: There are 2 correct answers to this question.

- \* Calculating the value of inventory on any time profile level ensuring flexibility of calculation
- \* Calculating how many periods inventory is going to last based on the planned demand
- \* Search for and return the last not null value of the inventory key figure
- \* Calculating the value of inventory on a weekly basis, using static aggregation from the daily level

#### QUESTION 70

You are setting up planing with lot sizes.What are some of the properties of lot sizes that you need to be aware of?Note: There are 2 correct answers to this question.

- \* Lot sizes are applicable for production and handling quantities.
- \* Periodic lot size setting overrides the minimum lot size.
- \* Lot sizes are time-independent master data settings.
- \* Lot sizes are applicable for production and transportation quantities.

#### QUESTION 71

Which of the following are capabilities of the Manage Forecast Error Calculations &#8211; Inventory Optimization app?Note: There are 2 correct answers to this question.

- \* Adjust for forecast bias in Forecast Error CV calculations
- \* Propagate forecast error to upstream locations in a supply chain network
- \* Adjust Safety Stock Recommendations based on forecast error CV input
- \* Identify intermittent demand for Forecast Error CV calculations

## QUESTION 72

How can the SAP IBP scenario modeling functionality support business users in the S&OP planning cycle? Note: There are 2 correct answers to this question.

- \* Simulate heuristics run in Supply Review stage
- \* Simulate statistical forecast at the Demand Review stage
- \* Simulate demand sensing inputs for Supply Review
- \* Model inventory turns based on Target Safety stocks

## QUESTION 73

What do you need to be aware of when using multiple pairs of key figures in one copy operator? Note: There are 2 correct answers to this question.

- \* Copying multiple key figures can be processed sequentially.
- \* If necessary source key figures values are disaggregated.
- \* Copying multiple key figures on different planning levels is not possible.
- \* If necessary target key figures values are disaggregated.
