### SAP C-HANATEC-19 Exam Syllabus Topics:

TopicDetailsTopic 1- Install, configure and monitor SAP HANA database systems- Performing the daily SAP HANA database administration tasks using SAP HANA cockpitTopic 2- SAP HANA Database Administration- SAP HANA Monitoring and TroubleshootingTopic 3- Database Migration Options for SAP HANA- Understand the SAP HANA database system security conceptsTopic 4- Configure and execute SAP HANA database system backups- Performing sizing, installation, update and post-installation tasks for the SAP HANATopic 5- SAP HANA Architecture and Deployment Options- Describing the SAP HANA database system architecture and the different deployment options

### QUESTION 27

Which actions can you perform using the SAP HANA platform lifecycle management web user interface? Note: There are 2 correct answers to this question.

- \* Configure the system landscape directory registration.
- \* Manage the full system information dumps.
- \* Update the SAP HANA database system
- \* Stop and start the SAP HANA database system

### QUESTION 28

Which feature do you use to dynamically manage SAP HANA database workloads per client session?

- \* Workload classes
- \* Admission control
- \* Parallel execution of SQL statements
- \* Non-Uniform Memory Access (NUMA)

### QUESTION 29

Which SAP HANA trace must you activate to analyze performance issues with systems where third-party software cannot be installed?

- \* End-to-end
- \* Kernel profiler
- \* SQL
- \* User-specific

### QUESTION 30

What is the recommended size for the log volume file system for a 512 GB SAP HANA database system?

- \* 614 GB
- \* 256 GB
- \* 512 GB
- \* 427 GB

### QUESTION 31

You are running an SAP HANA database in log mode `&#8220;normal&#8221;`

Under what circumstances does the database automatically execute a regular log backup?

Note: There are 2 correct answers to this question.

- \* When the log segment is full
- \* When a commit occurs
- \* When the time threshold is exceeded
- \* When the log buffer is full

### QUESTION 32

You want to implement a 28-day backup cycle. Which scenario uses the least storage?

- \* Full backup, incremental backup, log backup
- \* Full backup, log backup
- \* Incremental backup, log backup
- \* Full backup, differential backup, log backup

### QUESTION 33

You are checking and monitoring SAP HANA system replication

Which status indicates a temporary connection loss of the secondary system?

- \* Unknown
- \* Error
- \* Initializing
- \* Syncing

### QUESTION 34

What is the correct sequence of the following four steps when you restart the SAP HANA database system?

- \* 1. Row tables are loaded into memory.

2. Column tables loaded

3. Open transaction are recovered.

4. Aborted transactions are rolled back

- \* 1. Row tables are loaded into memory.

2. Open transactions are recovered

3. Aborted transactions are rolled back

4. Column tables are loaded

- \* 1. Aborted transactions are rolled back

2. Open transactions are recovered

3. Row tables are loaded into memory.

4. Column tables are loaded

- \* 1. Aborted transactions are rolled back

2. Row tables are loaded into memory.

3. Open transactions are recovered.

4. Column tables are loaded

### QUESTION 35

Which prerequisites must be fulfilled to rename a tenant database in the SAP HANA cockpit? Note: There are 2 correct answers to this question.

- \* The tenant database is stopped
- \* The tenant database must be unloaded from memory
- \* The on-disk tenant directory should be a mount point
- \* The tenant database is not part of a move operation.

### QUESTION 36

Which tasks can you perform when using the SAP HANA database lifecycle manager (HDBLCM) from the SAP HANA installation media? Note: There are 2 correct answers to this question.

- \* Uninstall the SAP HANA database system and its components
- \* Rename the SAP HANA database system.
- \* Update the SAP HANA database system and its components.
- \* Extract the SAP HANA database system components.

### QUESTION 37

What do need in a multitenant database container (MDC) system to run queries across tenant databases? Note: There are 2 correct answers to this question.

- \* The user in the source system must be associated with a user in the target database.
- \* The cross-tenant database communication must be explicitly activated
- \* The bidirectional communication channel must be whitelisted.
- \* The user in the source system must have sufficient privileges in the target database.

### QUESTION 38

Which features do you need to activate before you can analyze the memory usage of running SQL statements? Note: There are 2 correct answers to this question.

- \* Tracking
- \* In-memory tracing
- \* Statement memory limit
- \* Memory tracking

### QUESTION 39

You are performing a database migration option (DMO) procedure and applying SAP support packages in combination as an in-place migration. Which steps take place during downtime? Note: There are 2 correct answers to this question.

- \* Activation of dictionary objects in phase ACT UPG
- \* XPRAS execution in phase XPRAS AIMMRG
- \* Migration of application tables in phase EL) CLONE MIG DT RUN
- \* Creation of application tables in the target database in phase EU CLONE MIG DT CREATE

### QUESTION 40

You are registering an SAP HANA database resource using SAP HANA cockpit manager. Which privileges are automatically assigned when you initially create the COCKPIT MONITOR technical user? Note: There are 2 correct answers to this question.

- \* DATABASE ADMIN
- \* SELECT on the SYS TELEMETRY schema
- \* CATALOG RAED
- \* SELECT on the SYS STATISTICS schema

### QUESTION 41

Which actions take place during a database migration option (DMO) procedure when performing an in-place migration? Note: There are 2 correct answers to this question.

- \* One table is migrated per R3load pair
- \* De-pooling of tables is done during the procedure.
- \* TABART is considered for the creation of R3load control files.
- \* SAPup decides which tables to split.

#### QUESTION 42

What additional action do you need to perform after you create a new tenant in an SAP HANA system replication configuration?

- \* Copy the tenant database
- \* Restart the secondary system.
- \* Back up the tenant database
- \* Start the tenant database

#### QUESTION 43

Which services can you stop in the SAP HANA cockpit from the SYSTEMDB Manage Services app? Note: There are 2 correct answers to this question.

- \* Daemon
- \* Preprocessor
- \* Compile server
- \* Index server

#### QUESTION 44

Which system usage types are automatically assigned to tiles in the SAP HANA cockpit? Note: There are 3 correct answers to this question.

- \* Quality assurance
- \* Test
- \* Development
- \* Custom
- \* Production

#### QUESTION 45

Which technology is utilized by the Performance Warehouse option in the transaction DBACOCKPIT?

- \* SAP Business Intelligence
- \* SAP Data Warehouse Cloud
- \* SAP Analytics Cloud
- \* SAP Intelligent Query (SAP 10)

#### QUESTION 46

Which file system locations do need to specify when installing the SAP HANA multi-host database system using the default settings?

Note: There are 2 correct answers to this question.

- \* /hana/shared
- \* /usr/sap/hostctrl >/
- \* /hana/log/<SID>
- \* /usr/sap/<SID>

#### QUESTION 47

Which tools are integrated into the SAP HANA cockpit? Note: There are 3 correct answers to this question

- \* SQL Analyzer
- \* HDBAdmin
- \* HANASitter
- \* SQL Console
- \* Database Explorer

#### QUESTION 48

Which feature do you configure to prevent the whole SAP HANA database system from reaching physical processing limits?

- \* Workload classes
- \* Capture and replay
- \* Performance trace
- \* Admission control

#### QUESTION 49

Which SAP HANA cockpit application can you use to investigate a system offline situation?

- \* Full system information dumps
- \* CPU usage monitor
- \* Troubleshoot unresponsive system
- \* Out-of-memory event monitor

#### QUESTION 50

Which hardware KPIs do you need to size before performing a tailored data center integration (TDI) installation for a productive SAP HANA database system?

Note: There are 2 correct answers to this question.

- \* Network bandwidth for the storage zone
- \* Total disk space required for the log volume
- \* Persistent memory (PMEM) required for backups
- \* DRAM required for the static data memory area

#### QUESTION 51

How does SAP HANA encrypt the data persistence layer?

- \* By column level
- \* By page level
- \* By table level
- \* By row level
