- * Link to the hidden object and open it in the library.
- * Create an object reference that is visible.
- * Define a time range for the object to be hidden.
- * Use the hidden objects to generate documents.

QUESTION 17

A customer wants to use the Desktop Assistant for a target application that does not offer reliable re-recognition on object level. Which content types can still be offered? Note: There are 2 correct answers to this question.

- * Interactive guided tours
- * Highlights around text input fields
- * Guided tours with bubbles pointing to controls
- * Page-based context help bubbles

QUESTION 18

Why should you use questions in e-learning curricula (Books in SAP Enable Now)? Note: There are 2 correct answers to this question.

- * To set a score in an LMS via SCORM API
- * To motivate users by showing the total score
- * To keep learners' attention
- * To design motivating content

QUESTION 19

An animation in your book page does not start in the preview. What are some possible reasons? Note: There are 2 correct answers to this question.

- * The animation duration is set to a value lower than 1.
- * In the parameter section of the animation object, the target object is not set.
- * In the object list, the animation object is placed behind the animated object.
- * The animation is triggered by a Time Control, but the Time Control is not started.

QUESTION 20

Which of the following data types are supported in SAP Enable Now? Note: There are 3 correct answers to this question.

- * INTEGER

- * USERNAME
- * HTML
- * TIMESTAMP
- * TEXT

QUESTION 21

What should you consider when rolling out Desktop Assistant? Note: There are 3 correct answers to this question.

- * The Windows user profile size on the end user machine must meet the minimum requirements for caching purposes or the caching path needs to be changed.
- * Quality assurance and general responsibility need to be clarified prior to the go-live.
- * The end user needs administration rights in Windows to run Desktop Assistant.
- * The Desktop Assistant installation requires at least 20 GB of disk space on the end user machine.
- * Bandwidth and latency have to be tested on minimum requirements because slow electronic performance support will not be accepted.

QUESTION 22

What are characteristics of sustainable knowledge production? Note: There are 3 correct answers to this question.

- * No references
- * No redundancies
- * Maintainability
- * Generic library views
- * Multi-modality

QUESTION 23

Your customer wants to provide access to content using deep links. What must you consider? Note: There are

2 correct answers to this question.

- * A deep link including ../auth/.. forces authenticated access.
- * A deep link including ../~tag/published/.. works without forcing.
- * A deep link including ../pub/.. forces authenticated access.
- * A deep link including ../wa/.. forces anonymous access.

QUESTION 24

- * Authoring guidelines
- * A customized Producer installer
- * A custom application profile
- * An infrastructure diagram
- * A full corporate design customization

QUESTION 27

To localize a simulation project, what are the initial steps SAP recommends you do? Note: There are 2 correct answers to this question.

- * Use re-recording.
- * Use automated re-recording.
- * Export author texts to XLIFF or Microsoft Word format.
- * Translate author texts manually.

QUESTION 28

What are the best practices to create a recording? Note: There are 2 correct answers to this question.

- * Use the Quick Recording option for the best possible recording results.
- * Set up the application in the same way that the end user would use it.
- * Activate the roll-over effects in the settings for a realistic recording.
- * Create a short storyboard with the steps to be recorded and the data to be used.

QUESTION 29

What must you do before you update SAP Enable Now on-premise? Note: There are 2 correct answers to this question.

- * Download the SAP Enable Now installers from SAP Service Marketplace.
- * Edit the workarea resources entity.xml files manually.
- * Preview the new version of SAP Enable Now and test the content.
- * Back up the file repository and database.

QUESTION 30

Your customer wants to store all SAP Enable Now documentation within SAP Solution Manager. What do you tell the customer?

- * The integration is possible with any version of SAP Solution Manager on both client side and server side.
- * The integration is done from within Manager via scheduled synchronization.
- * The integration is possible between Producer and SAP Solution Manager 7.2 but will only provide deep links to the documentations.

QUESTION 31

The customer wants to offer Web Assistant content in several languages and wants to know whether it is necessary to create content in each language for the initial rollout. What would be the correct advice?

- * It is not necessary if the customer starts with English as the content language. English content is shown as a fallback if there is no

content available for a certain UI language.

- * It is necessary. The content must have the same language as the UI.
- * Web Assistant supports English content only.
- * It is not necessary if the customer starts with German as the content language. German content is shown as a fallback if there is no content available for a certain UI language.

QUESTION 32

In Producer, what must you consider when you modify files manually (not using the GUI)? Note: There are 2 correct answers to this question.

- * Producer uses the unmodified files from the workarea cache until a refresh is triggered.
- * Producer displays the results of file modifications after the file is saved.
- * Producer is NOT automatically notified of the manual changes.
- * Producer reports file modifications to the Manager when file editing is finished.

QUESTION 33

What is an advantage of using Object Visibility in book pages?

- * To fade in or out instead of only showing or hiding objects.
- * To display groups of objects.
- * To show more than one object with a single action
- * To reduce the total number of actions that must be maintained

QUESTION 34

You are planning an SAP Enable Now on-premise implementation. What must you do to ensure network security compliance? Note: There are 2 correct answers to this question.

- * Add the Upload Active Content permission to all users.
- * Contact network administrators to confirm that the network security restrictions allow the required MIME types.
- * Use standard ports only.
- * Adapt the password policy of the Manager to the password policy of the customer.
