EMC D-PDD-OE-23: Selling Dell Data Protection Products and Solutions

NEW QUESTION 77

A backup administrator is tasked with verifying the compression savings of a PowerProtect DD9900.

Which compression algorithm will they see enabled by default?

- * gz
- * lz
- * lzw
- * gzfast

NEW QUESTION 78

Following best practices for a PowerProtect DD CIFS environment, what is the recommended SESSTIMEOUT value in seconds?

- * 2600

- * 3000
- * 3600
- * 4600

NEW QUESTION 79

What is the preferred method to ensure backups are protected against deletion or corruption?

- * Dell EMC Cloud Tier
- * Encryption
- * Retention Lock
- * Data Invulnerability Architecture

NEW QUESTION 80

Which type of data replication can only be used with DD Boost on a PowerProtect DD appliance?

- * MTree
- * Collection
- * Managed File
- * Encrypted replication

NEW QUESTION 81

Which protocol is used for communications between a PowerProtect DD appliance and cloud tier to Dell EMC ECS?

- * HTTP
- * SSH
- * FTP
- * SSL

NEW QUESTION 82

A backup administrator is tasked with monitoring PowerProtect DD capacity metrics. The administrator is backing up 2 TB of data daily with a reduction rate at 5x. After data reduction, subsequent full backups compress down to 100 GB.

The initial backup requires 400 GB with a 10 percent increase in the data each day. Each incremental backup is 200 GB. After data reduction, each incremental backup is 20 GB.

What is the weekly burn rate (GB) after four daily incremental backups and one weekly backup?

- * 180
- * 200
- * 400
- * 440

NEW QUESTION 83

An administrator has retained snapshots for a single MTree and is trying to create a new one. An error message is received.

What is the reason for the failure?

- * The maximum number of snapshots has been exceeded
- * The DDOS needs to be upgraded
- * The user does not have the permission to retain more snapshots

- * There are not enough snapshot licenses

NEW QUESTION 84

Select all that apply: What are the benefits of using PowerProtect DD Virtual Edition?

- * Lower cost entry point for small businesses
- * Flexible deployment options
- * Enhanced security features compared to hardware editions
- * Same management interface as hardware editions

NEW QUESTION 85

What is the primary function of PowerProtect DD encryption?

- * Enhancing data transfer speeds
- * Complying with legal regulations
- * Reducing the amount of storage used
- * Increasing backup window times

NEW QUESTION 86

A company has implemented many-to-one replication between PowerProtect DD appliances.

Which types of replication are supported by this topology?

- * MTree and Collection
- * Managed File and MTree
- * Collection and Directory
- * Directory and MTree

NEW QUESTION 87

A backup administrator notices that the backups and replication are exceeding their backup window.

The system is also utilizing the DD Boost protocol.

They notice the system is experiencing slow performance and want to monitor performance in real-time.

Which command best accomplishes this task?

- * `system show stats interval 2`
- * `ddboost file-replication show stats`
- * `system show performance`
- * `ddboost show stats`

NEW QUESTION 88

In PowerProtect DD, what is the benefit of implementing the Data Invulnerability Architecture?

- * It reduces data replication traffic
- * It provides end-to-end data verification
- * It enables faster deduplication
- * It simplifies user access controls

NEW QUESTION 89

Which two elements does DD Boost distribute parts of the deduplication process in a backup environment to enable faster and more efficient backup and recovery? (Select 2)

- * Production storage
- * Backup server
- * Application client
- * PowerProtect DD

NEW QUESTION 90

A NetWorker administrator wants to create the DD Boost devices following PowerProtect DD best practices.

What is the recommended device resource max sessions?

- * 30
- * 32
- * 60
- * 62

NEW QUESTION 91

What is the maximum capacity for a DDVE?

- * 64 TB
- * 96 TB
- * 128 TB
- * 256 TB

NEW QUESTION 92

A PowerProtect DD backup administrator wants to delegate some Operations to their Monitoring and Control team. The administrator wants to add a user to the Monitoring and Control team with limited access to only check the health of the PowerProtect DD appliance.

Which role must be applied to the new user?

- * Backup Operator
- * Limited Admin
- * User
- * Tenant Admin

NEW QUESTION 93

Select all that apply: Which considerations are paramount when deploying PowerProtect DD in a multi-tenant environment?

- * Ensuring each tenant's data is isolated
- * Providing equal storage capacity to all tenants
- * Customizing interfaces for each tenant
- * Implementing robust access controls

NEW QUESTION 94

How does PowerProtect DD integrate with virtual environments for improved backup efficiency?

- * Direct hypervisor support
- * Storage API integrations
- * Native virtual machine snapshots
- * Automated VM conversion tools

NEW QUESTION 95

Which DDOS role is used for scheduling and running the backup application in a secure multi-tenancy environment?

- * Security Officer
- * Tenant Admin
- * Tenant User
- * Admin

NEW QUESTION 96

Which component is crucial for PowerProtect DD's disaster recovery capability?

- * Data Invulnerability Architecture
- * In-line Compression
- * High-speed Networking
- * GPU Acceleration

NEW QUESTION 97

What is a requirement to use the PowerProtect DD HA feature?

- * A single set of shared storage
- * Dual set of shared storage configuration
- * Head units and nodes require an active/active configuration
- * Each head unit requires its own FS25 shelf

NEW QUESTION 98

What should be considered when using replication with Dell EMC Cloud Tier?

- * Cloud Tier-enabled systems must use collection replication
- * Source system must be running DDOS 5.7 or higher to support replication to the cloud
- * Replicated file is placed in the active tier first when Cloud Tier is enabled
- * Replicated file is placed in a cloud unit first if Cloud Tier is enabled

NEW QUESTION 99

A backup administrator is tasked with verifying the compression settings of a DDVE instance.

Which compression algorithm will be enabled by default?

- * gzfast
- * lzw
- * lz
- * gz

NEW QUESTION 100

Which command is used to check if NFS is enabled?

- * nfs show clients
- * nfs enable
- * system show
- * nfs status

NEW QUESTION 101

When following Dell best practices, how many hops should Fibre Channel extended fabric configurations be limited when setting up a PowerProtect DD system?

- * Four hops
- * Two hops
- * One hop
- * Three hops
